**Developing New Products and Services** Lawrence Sanders, 2011-10-14. This book will focus on the up front activities required for product and service differentiation, the learning methodologies that contribute to arriving at that differentiation and the role that technology plays in implementing the process. The book will show how technology factors into such entrepreneurial activities as engaging in business planning and utilizing creativity and innovation and how creative innovation in turn is achieved and enhanced through an understanding of two different modes of learning: learning about and learning by doing. A successful product introduction depends on an efficient supply chain, a strong brand and the ability of a manufacturer or provider to differentiate it successfully in the marketplace. **New Product and Services Development** demonstrates how differentiation, this last critical component, can be secured by the strategic use of technology and by engaging in two key learning methodologies.
