

The following table shows the results of the regression analysis for the dependent variable "Performance" (Y-axis) and the independent variable "Experience" (X-axis). The table includes the regression equation, the coefficient of determination (R-squared), and the p-value for the regression coefficient.

Variable	Regression Coefficient	Standard Error	t-statistic	p-value
Intercept	1.2	0.3	4.0	0.0001
Experience	0.5	0.1	5.0	0.0001

The regression equation is: $Y = 1.2 + 0.5X$. The coefficient of determination (R-squared) is 0.90, indicating that 90% of the variance in Performance is explained by Experience. The p-value for the regression coefficient is 0.0001, which is less than the significance level of 0.05, indicating that the regression is statistically significant.
