Klassen,2018-04-23 At the dawn of the radio age in the 1920s a settler mystic living on northwest coast of British Columbia invented radio mind Frederick Du Vernet Anglican archbishop and self

declared scientist announced a psychic channel by which minds could telepathically communicate across distance Retelling Du Vernet's imaginative experiment Pamela Klassen shows us how agents of colonialism built metaphysical traditions on land they claimed to have conquered Following Du Vernet's journey westward from Toronto to Ojibwe territory and across the young nation of Canada Pamela Klassen examines how contests over the mediation of stories via photography maps printing presses and radio lucidly reveal the spiritual work of colonial settlement A city builder who bargained away Indigenous land to make way for the railroad Du Vernet knew that he lived on the territory of Tsmsyen Nisga'a and Haida nations who had never ceded their land to the onrush of Canadian settlers He condemned the devastating effects on Indigenous families of the residential schools run by his church while still serving that church Testifying to the power of radio mind with evidence from the apostle Paul and the philosopher Henri Bergson Du Vernet found a way to explain the world that he his church and his country made Expanding approaches to religion and media studies to ask how sovereignty is made through stories Klassen shows how the spiritual invention of colonial nations takes place at the same time that Indigenous peoples including Indigenous Christians resist colonial dispossession through stories and spirits of their own A History of World Societies, Combined Volume John P. McKay, Bennett D. Hill, John Buckler, Patricia Buckley Ebrey, Roger B. Beck, Clare Haru Crowston, Merry E. Wiesner-Hanks, 2011-10-05 A History of World Societies introduces students to the global past through social history and the stories and voices of the people who lived it The book's regional and comparative approach helps students understand the connections of global history while providing a manageable organization With global connections and comparisons documents features and activities that teach historical analysis **Ethics for Engineers** Anthony F. REVIEW S 100 NOTABLE BOOKS OF 2022 From the historian Dan Bouk a lesson in reading between the lines of the U S census to uncover the stories behind the data The census isn t just a data collection process it s a ritual and a tool of American democracy Behind every neat grid of numbers is a collage of messy human stories you just have to know how to read them In Democracy s Data the data historian Dan Bouk examines the 1940 U S census uncovering what those numbers both condense and cleverly abstract a universe of meaning and uncertainty of cultural negotiation and political struggle He introduces us to the men and women employed as census takers bringing us with them as they go door to door recording the lives of their neighbors He takes us into the makeshift halls of the Census Bureau where hundreds of civil servants not to mention machines labored with pencil and paper to divide and conquer the nation s data And he uses these little points to paint bigger pictures such as of the ruling hand of white supremacy the place of queer people in straight systems and the struggle of ordinary people to be seen by the state as they see themselves The 1940 census is a crucial entry in American history a controversial dataset that enabled the creation of New Deal era social programs but that also with the advent of World War Two would be weaponized against many of the citizens whom it was supposed to serve In our age of quantification Democracy s Data not only teaches us how to read between the lines but gives us a new perspective on the relationship between representation identity and governance today
