somewhat predestined by its affiliation with a particular social class Since 1964 a new documentary was filmed every seven years hence the production of the sequels *Seven Up* *7 Plus Seven* *21 Up* *28 Up* *35 Up* and *42 Up* in order to follow up on the lives of these children and to document their personal developments from childhood to adulthood All chosen individuals were interviewed throughout the series and asked questions about their experiences in life how they spend their spare time how they perceive the world around them which level of education they would like to attain at some point and their general future plans The purpose of these interview questions was whether the Jesuit motto proves to be true and therefore confirms that the ideas values and expectations of a seven year old child indeed condition their future The fourteen children who took part in this documentary are Bruce Balden Jackie Bassett Symon Basterfield Andrew Brackfield John Brisby Peter Davies Susan Davis Charles Furneaux Nicholas Hitchon Neil Hughes Lynn Johnson Paul Kligerman Suzanne Lusk and Tony Walker

*An Introduction to Generalized Linear Models* George H. Duntelman, Moon-Ho R. Ho, 2006 Do you have data that is not normally distributed and don't know how to analyze it using generalized linear models GLM Beginning with a discussion of fundamental statistical modeling concepts in a multiple regression framework the authors extend these concepts to GLM including Poisson regression logistic regression and proportional hazards models and demonstrate the similarity of various regression models to GLM Each procedure is illustrated using real life data sets and the computer instructions and results will be presented for each example Throughout the book there is an emphasis on link functions and error distribution and how the model specifications translate into likelihood functions that can through maximum likelihood estimation be used to estimate the regression parameters and their associated standard errors This book provides readers with basic modeling principles that are applicable to a wide variety of situations Key Features Provides an accessible but thorough introduction to GLM exponential family distribution and maximum likelihood estimation Includes discussion on checking model adequacy and description on how to use SAS to fit GLM Describes the connection between survival analysis and GLM This book is an ideal text for social science researchers who do not have a strong statistical background but would like to learn more advanced techniques having taken an introductory course covering regression analysis

*Making Sense of Social Theory* Charles H. Powers, 2010-01-16 Making Sense of Social Theory opens by carefully exploring what it means to follow the scientific method in a field like sociology The author goes on to analyze sociology as a genuine science with a body of explanatory insights It does this by a considering the major insights of key thinkers including Marx Durkheim Weber and Mead among others b distinguishing different analytical frameworks especially exchange symbolic interactionism conflict and structural functionalism in terms of their underlying assumptions and c revealing compelling social science explanatory insights in the form of predictive principles that can be applied in understanding processes of change at work in the social world from face to face encounters to major historical trends Sociological theory is applied in ways that make its relevance and power apparent In reading this book theory no longer stands divorced from real world research or practice Making

Sense of Social Theory clearly establishes the pertinence of sociology's great theoretical insights for all social science researches and practitioners Book jacket
