The Art of Computer Virus Research

and Defense Peter Szor, 2005-02-03 Symantec's chief antivirus researcher has written the definitive guide to contemporary virus threats, defense techniques, and analysis tools. Unlike most books on computer viruses, *The Art of Computer Virus Research and Defense* is a reference written strictly for white hats: IT and security professionals responsible for protecting their organizations against malware. Peter Szor systematically covers everything you need to know, including virus behavior and classification, protection strategies, antivirus and worm blocking techniques, and much more. Szor presents the state of the art in both malware and protection, providing the full technical detail that professionals need to handle increasingly complex attacks. Along the way, he provides extensive information on code metamorphism and other emerging techniques so you can anticipate and prepare for future threats. Szor also offers the most thorough and practical primer on virus analysis ever published, addressing everything from creating your own personal laboratory to automating the analysis process. This book's coverage includes: Discovering how malicious code attacks on a variety of platforms; Classifying malware strategies for infection in memory; operation, self-protection, payload delivery, exploitation, and more; Identifying and responding to code obfuscation threats; encrypted, polymorphic, and metamorphic; Mastering empirical methods for analyzing malicious code and what to do with what you learn; Reverse engineering malicious code with disassemblers, debuggers, emulators, and virtual machines; Implementing technical defenses: scanning, code emulation, disinfection, inoculation, integrity checking, sandboxing, honeypots, behavior blocking, and much more; Using worm blocking, host-based intrusion prevention, and network-level defense strategies.

Smart Networks Olli Martikainen, Kimmo Raatikainen, Jenni Hyvärinen, 2012-08-10 *Smart Networks* comprises the proceedings of Smartnet 2002, the seventh conference on Intelligence in Networks, which was sponsored by the International Federation for Information Processing (IFIP) and organized by Working Group 6.7. It was held in Saarisele, Finland, in April 2002. The conference series closely reflects the developments in networking.

Traffic and Performance Engineering for Heterogeneous Networks Demetres D. Kouvatsos, 2022-09-01 The diversity of methodologies and applications in the literature for the traffic engineering performance modelling and analysis of convergent multiservice heterogeneous networks attests to the breadth and richness of recent research and developments towards the design and dimensioning of the next and future generation Internets. *Heterogeneous Networks: Traffic Engineering Performance Evaluation, Studies, and Tools* describes recent advances in networks of diverse technology, reflecting the state of the art technology and research achievements in traffic engineering performance evaluation studies and tools worldwide. Technical topics presented in the book include: Traffic Modelling and Characterisation; Queueing and Interconnection Networks; Performance Evaluation Studies; TCP Performance Analysis; Congestion Control; Application Layer Multicast; Numerical and Software Tools. This book contains recently extended research papers which have their roots in the series of the HET-NETs International Working Conferences focusing on the Performance Modelling and Evaluation of Heterogeneous Networks under the auspices of the EU Networks of Excellence Euro-NGI and Euro-FGI. *Heterogeneous Networks: Traffic Engineering*

Performance Evaluation Studies and Tools is ideal for personnel in computer communication industries as well as academic staff and master research students in computer science operational research electrical engineering and telecommunication systems and the Internet Hybrid-Context Instructional Model Udeme T. Ndon,2010-10-01 This book is a product of a dissertation project that was completed in December 2006 This project investigated teachers experiences in relation to teaching and learning using the hybrid context instructional model The dissertation itself has been noted as one of the best in providing practical tips for teachers in this area The study methodology is included as appendix B To answer the questions raised during the interviews the findings of the study have been supplemented and supported with extensive literature review of empirical studies to provide theoretical and practical solutions The literature review draws from total Internet blended and hybrid instruction studies The literature on the total Internet instruction has relevance in that the Internet piece of the hybrid context course shares the same course management systems and requires the same approaches and principles as do total Internet instruction The book discusses the conceptual and descriptive presentations of the hybrid context model media applicable teaching philosophies strategies best accomplished in each medium various ways of linking the face to face and the Internet activities the why and how the study participants transitioned into teaching hybrid context courses teachers expectations etc The discussion on labor of love is the core of this book as the discussion has captured the surprises the study participants met in a way that is not reflected in the current literature Built into this discussion are the amounts of things teachers had to learn in order to function well as hybrid context model teachers The contents of this book will aide teachers who teach in any way using the Internet Therefore any establishment individual using the Internet for teaching and learning will benefit from the contents of this book Also the administrators will find this book a selling point to encourage more participation in the adoption of the hybrid context instructional model as well as realizing what the teachers would need to successfully implement this phenomenon Computational Science — ICCS 2003 Peter M.A. Sloot,David Abramson,Alexander V.
