Predictive Modeling of Human Microbiota and their Role in Health and Disease Hyun-Seob Song,Steve Lindemann,Dong-Yup Lee,2022-01-19

Reward Processing in Motivational and Affective Disorders Frank Ryan,Nikolina Skandali,2016-10-11 Preferential reward processing is the hallmark of addiction where salient cues become overvalued and trigger compulsion In depression rewards appear to lose their incentive properties or become devalued In the context of schizophrenia aberrations in neural reward signalling are thought to contribute to the overvaluation of irrelevant stimuli on the one hand and the onset of negative symptoms on the other Accordingly reward processing has emerged as a key variable in contemporary evidence based diagnostic frameworks such as the Research Domain Criteria launched by the United States National Institute of Mental Health Delineation of the underlying mechanisms of aberrant or blunted reward processing can be of trans diagnostic importance across several neuropsychiatric disorders Reward processing can become automatic thus raising the question of cognitive control a core theme of this Topic which aims at justifying the necessity of reward processing as a potential therapeutic target in clinical settings Empirical and theoretical contributions on the following themes were expected to Explore new avenues of research by investigating the processing of rewards at the cognitive behavioral motivational neural systems and individual difference levels A developmental focus is promising in this regard probing the core processes that shape reward processing and thus subsequent liability to motivational and affective disorders Develop and refine conceptual models of reward processing from computational neuroscience Promote greater understanding and development of emergent therapeutic approaches such as cognitive bias modification and behavioural approach or avoidance training A key question is the feasibility of reversing or modifying maladaptive patterns of reward processing to therapeutic ends Refine and augment the evidential database for tried and tested therapies such as Contingency Management and Behavioral Activation by focusing on core cognitive processes mediating rewards Provide a potential dimensional approach for reward processing deficits that can be of trans diagnostic importance in clinically relevant disorders including depression and addiction Investigate the subjective experience of pleasure the hedonic aspect of reward seeking and consumption and how this can be distinguished from the motivational sometimes compulsive component of reward pursuit This promises more nuanced and

effective interventions Depression for instance could be seen as the restricted pursuit of pleasure rather than blunted pleasure experience addiction can be viewed as accentuated drug seeking despite diminished consummatory pleasure This aims to place motivation centre stage in both scenarios emphasising the transdiagnostic theme of the Topic Temporal discounting of future rewards whereby smaller more immediate rewards are chosen even when significantly more valuable deferred rewards are available is another trans diagnostic phenomenon of interest in the in the present context Factors that influence this such as discounting of future reward are thought to reflect compulsion in the addictive context and hopelessness on the part of people experiencing depression The executive cognitive processes that regulate this decision making are of both scientific and clinical significance Empirical findings theoretical contributions or commentaries bearing on cognitive or executive control were therefore welcome

Metabolic Control of Brain Homeostasis Detlev Boison, Jochen C. Meier, Susan A. Masino, 2017-10-03 Brain function is under metabolic control which in turn determines the equilibrium of homeostatic systems that affect neuronal and glial networks on the molecular cellular and systems levels The collection of articles ranges from molecules and mechanisms involved in regulating homeostasis and neuronal excitability to therapeutic mechanisms tailored to restore homeostatic function It also features neurological diseases and novel treatment approaches that are based on metabolic and homeostatic interventions Together the collection of articles outlines novel strategies to restore brain function in neurology and highlights limitations of conventional pharmacological approaches We suggest that restoration of molecular and biochemical networks could lead to a new era of therapeutic opportunities

The Top Books of the Year Hc2014 001 02 Human Computation Volume 1 Issue The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have enthralled audiences this year. Hc2014 001 02 Human Computation Volume 1 Issue : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Hc2014 001 02 Human Computation Volume 1 Issue : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Hc2014 001 02 Human Computation Volume 1 Issue : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
