Perfecting Private Practice Joan Neehall-Davidson, 2004 In a readily accessible easy to read format this book presents useful hints suggestions anecdotes and lists that will help you to look within identify and ultimately achieve your personal and professional goals From getting started with the actual physical space that is your office to the incorporation and financial establishment of your practice to dealing with the most unexpected unpredictable clients and their expectations and to planning for the unexpected the answers are here The straightforward hands on approach makes reading simple the inclusion of anecdotes adds realism and interest the quick checks provide instant reminders and cues and the self disclosure questions aid in self understanding All of the suggestions are grounded in practice Some may be familiar to you already some may be novel and unexpected Sometimes however simple reminders or hints can be the most powerful and with that in mind this book was written in an attempt to demystify some of the confusion

and or uncertainty surrounding the successful establishment and functioning of a private practice **First Responder Trauma Recovery Guide and Workbook (First Edition)** Kevin William Grant, 2021-07-14 Stress anxiety depression trauma post traumatic stress disorder PTSD bullying and burnout have all become accepted realities for first responders in the modern workplace This workbook unpacks contemporary workplace realities educates you about trauma and helps you build your personalized recovery plan for transformation recovery and healing This recovery program has eight core purposes Validate your current situation This recovery program begins by validating your experiences and breaking through any denial you may be experiencing by examining all the ways you could be traumatized at work Identify your realities Once you understand how you've been traumatized you'll learn about how trauma develops and how to break through the defenses that protect you from the painful experiences you're facing Understand workplace trauma Armed with a deeper understanding of what trauma is how it develops and how you react to trauma you will be able to identify the support you'll need to heal and recover Build your recovery team and develop your action plan Useful tools and techniques will help you connect with and build your team of support professionals and advocates Once you begin working with your team you'll start the recovery process by acquiring a set of skills and techniques to help you weather the storm and begin healing Grieve mourn and let go Recovery will take you on a journey of grieving mourning and letting go which will transport you to a new sense of calm and acceptance I'll break down this journey into the stages you'll travel through to get to the other side Maintain your recovery Finally I'll share helpful ways to maintain your recovery manage setbacks with compassion and track your progress so you can proactively navigate the inevitably choppy waters as you continue your healthy and productive recovery Adapt and adjust to the impacts of the COVID 19 Pandemic The COVID 19 global Pandemic has left a lasting impact on all our lives This section will review the Pandemic's mental health physical health and social implications with helpful tools and techniques to help you manage the trauma and stress the Pandemic brings In addition gems of wisdom and learnings within the research literature will help you navigate the Pandemic and Post Pandemic worlds effectively Learn interactively with workbook exercises Workbook exercises will help you digest the content reflect on your situation learn from that reflection and incrementally create a personalized recovery plan Each exercise in the workbook walks you through a process of self reflection and self discovery to help you understand and make sense of your situation First Responder Careers Expose Individuals to Higher Risks of Developing Trauma Some careers include a higher likelihood of experiencing traumatic events that can lead to the development of PTSD Serving in the military is a high risk factor for developing PTSD However combat veterans develop PTSD at different rates depending on the severity and length of exposure to traumatic experiences There are also high incidences of reported sexual harassment and sexual abuse in the military As a result the rates of PTSD are relatively high compared to the overall prevalence in the general population Not only can law enforcement officers experience direct threats and stressful conditions but they also regularly witness the devastating effects of assaults

robberies kidnappings and violent events However individuals in this profession have lower than expected rates of PTSD surprisingly An estimated 20 percent overall may result from having access to counseling and rigorous pre employment screenings EMTs and paramedics are routinely exposed to life threatening incidents and have more health problems than individuals in other occupations PTSD rates in this group are as high as 20 percent PTSD prevalence in this profession is comparable to law enforcement Firefighters conduct paramedic activities and are the first responders to natural disasters Firefighting is a dangerous profession that exposes workers to stressful conditions and traumatic events ranging from threats to their safety and experiencing the devastating effects of catastrophes As a result the prevalence of PTSD in this group can be as high as 20 percent Volunteer firefighters may have even higher rates because they don t have access to the same level of support as career firefighters Healthcare workers especially those working in emergency rooms and intensive care units are also at higher risk For example nurses working in critical care units are more likely to develop PTSD than nurses in other groups In addition while senior level nurses report fewer PTSD symptoms than junior ones they report higher rates of burnout Finally healthcare workers exposed to patients that have experienced violence such as an assault victim are more likely to develop PTSD than surgeons who treat assault victims Rescue workers medical workers and volunteers who act as first responders during disasters witness the aftermath of horrific events and can even become involved in severe traumatic events The prevalence of PTSD in these individuals has been estimated to be between 15 and 30 percent Journalists who work as war correspondents are at higher risk of being injured killed or kidnapped Their lifetime prevalence of PTSD which can be as high as 30 percent reflects their lack of access to support and PTSD treatment options Transit and train operators are frequently exposed to physical threats and witness suicide incidents such as person under train events Exposure to these traumatic and threatening circumstances can be a daily or weekly occurrence Bus drivers are more prone to PTSD because they have more direct contact with the general public than train drivers locked in secure train cabs In these high risk professions the incidence of trauma declines when policies are in place to debrief victims give victims immediate access to counseling and screen for individuals at high risk of having adverse reactions to traumatic conditions

Essential Self-Care for Caregivers and Helpers , Do you often daydream and muse on how wonderful it would be for someone to regularly be attending to YOUR needs Do you spend a large part of each day helping others to feel better This book may challenge your old patterns of thinking but following Brockman s Primary Directive to

take care of yourself first your life will start to transform and your health and well being will begin to shift in a healing direction Howard Brockman LCSW has written his second book this time emphasizing the importance of self care for the legions of people supporting and taking care of others While there are books that have been written about the challenges to professionals such as social workers nurses and psychologists to becoming burned out Brockman s book is written also for the millions of untrained non professionals who are being recruited daily to care for their elderly parents Do you fit into either of these categories He describes the many influences that lead to compassion fatigue and becoming infected by the feelings of others This is all about how unconscious empathy can take sensitive caregivers down a never ending spiral to adrenal fatigue and depression In Chapter 2 Characteristics of High Intensity Relaters Brockman describes the primary personality of those helpers whose currency is relationship and who easily fall prey to subtle energetic influences that erode their vital force Externally referencing to others needs first tends to be one of their traits Chapter 6 Prevent Self Sabotage is filled with practical ways to stay focused and positive while overcoming old repetitive and negative inner chatter Confronting your tyrannizing inner critic is never easy Brockman tells you how He identifies different types of energy drainers that use our energy to enliven themselves and deplete ours He does a good job explaining how to create secure and persistent energetic boundaries with difficult and demanding people and other disruptive environments This is perhaps the most important theme woven throughout the book for the helper personality tends to not know how to say NO to requests from others Learning how to establish reliable energetic boundaries is incredibly important for protecting against the interpersonal hazard he refers to as psychotoxic contamination that can become cumulative over time and generate serious long term health consequences Dark and heavy energy can settle into and invade the body to wreak havoc with one s health and emotional stability The good news is that you can effectively create these boundaries and more importantly learn how to sustain them amidst the ongoing demands of the people you are helping He spends a chapter on how to use specific energy psychology techniques for emergency self care providing fascinating case examples to illustrate how to prevent post traumatic stress from building up to become PTSD Brockman spends some time explaining the importance of optimizing your self care by managing your chi and how plants the natural world and flower essences can support helpers to maintain their inner balance and overall harmony In Chapter 11 Making It Happen From Within you will discover well described and powerful imagery techniques for manifesting positive self care outcomes for yourself Brockman then teaches you how to connect to and work with your inner guides for reliable personal and professional guidance The power of a caregiver s presence is highlighted in the concluding chapter discussing how being the blessing actually creates collective coherence in the immediate caregiver s environment and thus positively affects those who are being cared for For readers who would like to measure and determine the degree of their own present health and well being there are two self assessment checklists for high intensity relaters in Appendix 2 that can also be downloaded from his website [www DynamicEnergeticHealing com](http://www.DynamicEnergeticHealing.com)
