Corporate Finance Study Guide

Block I : Intro: Value-creating financial policy

Topic : Intro

Reading : BMAE 1

- **Real assets** are needed by a corporation to do business; **tangible assets** (oil fields, factories and machines) and **intangible assets** (patents, brands and corporate culture)
- Corporations pay for their real assets by selling claims on them and the cash flows they will generate. These claims are called **financial assets**. Examples :
    1. Bank loan : the bank provides the corporation with cash in exchange for a financial asset, which is the corporation's promise to repay the loan with interest
    2. Corporate bond : the corporation sells the bond to investors in exchange for the promise to pay interest on the bond and to pay off the bond at its maturity

  The main difference between a bond and a bank loan : bonds can be sold second-hand to other investors in financial markets. Tradeable financial assets are known as **securities**.

- **Investment decision = purchase of real assets**. But more than this, the investment decision also involves **managing assets already in place and deciding when to shut down and dispose of assets that are no longer profitable**. The corporation also has to manage and control the risks of its investments

    - GSK and other pharmaceutical companies invest billions every year on R&D for new drugs, consumer good companies such as Unilever or P&G invest huge sums in advertising and marketing.
