Delight Your Customers Steve Curtin, 2013-07-19 Discover the hidden ways to raise your organizations customer service experiences from ordinary to extraordinary If you want to know how strong your company's customer service is ask your employees to describe what their work entails Then pay attention to whether they simply list their duties and tasks or if they speak to the true essence of their job to create delighted customers who will be less price sensitive have higher repurchase rates and enthusiastically recommend the company or brand to others The latter should be every employee's highest priority because when it's not your customers are merely the recipients of a transaction not an experience and transactions do not make for a lasting impression or inspire loyalty In *Delight Your Customers* customer service expert Steve Curtin makes a compelling case that customer service managers need to shift from monitoring service activities to modeling recognizing and reinforcing the behaviors that create happy and returning customers Things such as Expressing genuine interest Offering sincere compliments Sharing unique knowledge Conveying authentic enthusiasm Providing pleasant surprises Delivering service heroics when needed Simply based on their own personal experiences everyone knows that great customer service is rare So why wouldn't you want to provide a unique caring and beneficial experience for all your customers to rave about with others With the real world stories examples and strategies shared in *Delight Your Customers* you can take the customer service experience you offer from ordinary to extraordinary

Measuring the Global Burden of Disease Nir Eyal, Samia A. Hurst, Christopher J.L. Murray, S. Andrew Schroeder, Daniel Wikler, 2020-05-19 The Global Burden of Disease Study GBD is one of the largest scale research collaborations in global health distilling a wide range of health information to provide estimates and projections for more than 350 diseases injuries and risk factors in 195 countries Its results are a critical tool informing researchers policy makers and others working to promote health around the globe A study like the GBD is of course extremely complex from an empirical perspective But it also raises a large number of complex ethical and philosophical questions that have been explored in a series of collaborations over the past twenty years among epidemiologists philosophers economists and policy scholars The essays in this volume address issues of current and urgent concern to the GBD and other epidemiological studies including rival understandings of causation the aggregation of complex health data temporal discounting age weighting and the valuation of health states The volume concludes with a set of chapters discussing how epidemiological data should and should not be used Better appreciating the philosophical dimensions of a study like the GBD can make possible a more sophisticated interpretation of its results and it can improve epidemiological studies in the future so that they are better suited to produce results that can help us to improve global health **Policy and Practices for Biodiversity in Managed Forests** Fred Bunnell, 2011-11-01

when we are there The first three chapters set the stage and provide context Fred Bunnell reviews the changing values desired from forests and changing rhythms within a forest the living dance He and Ann Chan McLeod then describe issues of managed forests that complicate efforts to sustain biological diversity Jagmohan S Maini provides an overview of policy issues confronting governments The next five chapters treat these questions and management actions at different levels of biological organization They begin with genetics Gene Namkoong and populations Gray Merriam proceed through communities Daniel Simberloff and landscapes J Stan Rowe closing with a more general treatment of scale Reed F Noss The final chapter integrates the treatments of different scales of organization by returning to the original 17 questions and providing answers based on current knowledge Policy and Practices for Biodiversity in Managed Forests addresses the major problems facing policy makers and managers in sustaining biological diversity in managed forests It is important because it links the scientific knowledge about biodiversity to the management of biodiversity bridging the gap between scientists and decision makers The unique focused approach of this book makes it useful for students resource practitioners and policy makers
