Rethinking Participation in Global Governance Joost Pauwelyn,Martino Maggetti,Tim Büthe,Ayelet Berman,2022-05-05 International organizations and other global governance bodies often make rules and decisions without input from many of the individuals groups firms and governments that are affected by them The standards of the Basel Committee on Banking Supervision for instance developed by a small number of states govern financial markets and the safety of bank deposits in over a hundred jurisdictions Historically the interests of developing countries as well as non commercial and diffuse interests within countries have been excluded or disregarded in global governance Scholars and practitioners have criticised this democratic deficit and called for greater participation of such marginalized stakeholders Against this background international institutions have introduced a variety of reforms with the goal of increasing and facilitating the participation of these excluded stakeholders This book brings together an expert group of scholars and practitioners to investigate the consequences of stakeholder participation reforms in the global governance of health and finance What reforms have been introduced Have these reforms given previously marginalized stakeholders a voice in global governance bodies What effect have these reforms had on the legitimacy and effectiveness of global governance To answer these questions the book examines treaty based intergovernmental organizations alongside newer forms of global governance such as trans governmental regulatory networks multi stakeholder partnerships and private standard setting bodies Through a series of

paired comparative analyses the book provides insights into the experiences of large emerging and smaller or lower income developing countries Brazil v Argentina China v Vietnam India v the Philippines in a diverse set of organizations including the World Bank and the World Health Organization the Basel Committee on Banking Supervision the Global Fund to Fight AIDS Tuberculosis and Malaria the International Accounting Standards Board Codex Alimentarius Commission and more

The Human Side of Service Engineering Christine Leitner,Clara Bassano,Debra Satterfield,2025-07-26 Proceedings of the 16th International Conference on Applied Human Factors and Ergonomics and the Affiliated Conferences Orlando Florida USA 26 30 July 2025 **The Silent Sex** Christopher F. Karpowitz,Tali Mendelberg,2014-08-24 Do women participate in and influence meetings equally with men Does gender shape how a meeting is run and whose voices are heard The Silent Sex shows how the gender composition and rules of a deliberative body dramatically affect who speaks how the group interacts the kinds of issues the group takes up whose voices prevail and what the group ultimately decides It argues that efforts to improve the representation of women will fall short unless they address institutional rules that impede women s voices Using groundbreaking experimental research supplemented with analysis of school boards Christopher Karpowitz and Tali Mendelberg demonstrate how the effects of rules depend on women s numbers so that small numbers are not fatal with a consensus process but consensus is not always beneficial when there are large numbers of women Men and women enter

deliberative settings facing different expectations about their influence and authority Karpowitz and Mendelberg reveal how the wrong institutional rules can exacerbate women s deficit of authority while the right rules can close it and in the process establish more cooperative norms of group behavior and more generous policies for the disadvantaged Rules and numbers have far reaching implications for the representation of women and their interests Bringing clarity and insight to one of today s most contentious debates The Silent Sex provides important new findings on ways to bring women s voices into the conversation on matters of common concern *Networked Media, Networked Rhetorics* Damien Smith Pfister,2016-01-01 In Networked Media Networked Rhetorics Damien Pfister explores communicative practices in networked media environments analyzing in particular how the blogosphere has changed the conduct and coverage of public debate Pfister shows how the late modern imaginary was susceptible to deliberation traps related to invention emotion and expertise and how bloggers have played a role in helping contemporary public deliberation evade these traps Three case studies at the heart of Networked Media Networked Rhetorics show how new intermediaries including bloggers generate publicity solidarity and translation in the networked public sphere Bloggers flooding the zone in the wake of Trent Lott s controversial toast to Strom Thurmond in 2002 demonstrated their ability to invent and circulate novel arguments the pre 2003 invasion reports from the Baghdad blogger illustrated how solidarity is built through affective connections and the science blog RealClimate continues to serve as a rapid response site for the translation of expert claims for public audiences Networked Media Networked Rhetorics concludes with a bold outline for rhetorical studies after the internet Contesting the Nigerian State M. Okome,2013-07-03 In public choice theory the received wisdom has long been that self organization is an impediment to collective action whether via the tragedy of the commons or a Hobbesian scenario in which self interest produces social conflict rather than cooperation Yet as this fascinating collection shows self organization and state society relations have been much more complicated in the context of contemporary Nigerian politics Given the absence or unwillingness of the Nigerian state to provide essential services entire communities have had to band together to repair roads build health centers and maintain public utilities all from levies The successes failures and ongoing challenges faced by Nigerian society provide valuable insights into the state s capacity its relationship with civil society and the social economic and political well being of its citizens **Political Phenomenology** Hwa Yol Jung,Lester Embree,2016-06-13 This volume presents political phenomenology as a new specialty in western philosophical and political thought that is post classical post Machiavellian and post behavioral It draws on history and sets the agenda for future explorations of political issues It discloses crossroads between ethics and politics and explores border crossing issues All the essays in this volume challenge existing ideas of politics significantly As such they open new ways for further explorations BY future generations of phenomenologists and non phenomenologists alike Moreover the comprehensive chronological bibliography is unprecedented and provides not only an excellent picture of what phenomenologists have already done but also a guide for

the future **Beyond Instrumentalised Politics** Garrett Thomson,Scherto Gill,2024-05-06 The weaknesses of aggregative representative democracy point to the current governments failures so prevalent in the West that there are few innovative alternatives Given that major global challenges all hinge on the transformation of public governance it has become a most pressing matter for humanity to re conceptualise future making approaches to governance This series aims to explore constructive and promising orientations to democracy *Democratic Innovations in Central and Eastern Europe* Sergiu Gherghina,Joakim Ekman,Olena Podolian,2020-05-21 Democratic Innovations in Central and Eastern Europe expands research on democratic innovations by looking specifically at different forms of democratic innovations in Central and Eastern Europe The book covers direct democracy referendums in particular deliberative democracy practices and e participation forms which are salient in practice because they match the political realities of our time Expert contributors show how the recent actions of ordinary citizens in several Central and Eastern European countries have challenged the contemporary political order and grassroots movements and diverse forms of mobilization have challenged the notion of weak civil societies in the East The empirical evidence presented attempts to deepen citizen involvement in political contexts sometimes quite different from the democratic political systems in the Western world Using lessons from a still largely underexplored part of Europe the book both complements and revises theoretical approaches or complements empirical results in existing studies on democratic innovations Democratic Innovations in Central and Eastern Europe will be of great interest to scholars working on democracy political systems political engagement and Central and Eastern European politics The chapters originally published as a special issue of Contemporary Politics
