An Analysis of Albert Hourani's A History of the Arab Peoples Brown, Bryan Gibson, 2017-07-05 Few works of history make as well structured a case for the importance of studying continuity rather than change than Albert Hourani s A History of the Arab Peoples Hourani s work had three major aims to refute the idea that Arab society stagnated between 1000 and 1800 to study the period through the lens of diverse Arab rather than Muslim history and to stress intellectual and cultural continuity All of these intentions were the product of the author s evaluation of a great mass of secondary sources many of them devoted to arguing for ideas that contradicted his and it demanded considerable skill to synthesize from them a coherent and well evidenced counter argument Hourani was able to do this largely because his grasp of the relevance and adequacy of his predecessors arguments was second to none his achievement lies in his ability to reject the reasoning of other historians while still making good use of their evidence In this task he was aided by an interpretative skill almost equal to his powers of evaluation A History of the Arab Peoples is also a monument to the importance of properly understanding the meaning of available evidence

40 Episodes on Persian Figures Nadia Maftouni,2017-10-16 Although this book is dedicated to author s course ESL for humanities it as well includes some parts of the history of Persian scientists Here an expert follow Better known as Nasir al Din Toosi or simply Toosi in the West he was a mathematician physician astronomer logician philosopher jurispudent and theologian staying abreast of the sciences of his time Toosi corresponded with Sadr al Din Qunawi the son in law of ibn Arabi It appears however Toosi was not well absorbed in the conversation Composing his own manual of philosophical mysticism in Awsaf al Ashraf Toosi assumed that Sufism so propagated by the masters of his time could not compel his attention

Islamic Economics and Human Well-being Muhammad A. Khan,2024-05-02 The study of Islamic economics provides an interesting complement to conventional economics as they both study economic behaviour to enhance human well being Muhammad Akram Khan articulates an expert view on how to use distinct approaches to achieve this in the context of Islamic economics

The Tragedy of Human Development Tim Di Muzio,2017-12-12 How might an objective observer conceive of what humans have accomplished as a species over its brief history Benjamin argues that history can be judged as one giant catastrophe Liberals suggest that this is to sombre an assessment and that human history can be read as a story of greater and greater progress in human rights prosperity and the decrease of arbitrary and extra judicial violence But is there a third reading of history one that neither interprets human history as a giant catastrophe or endless progress Could we not say that human development has been a tragedy This book explores the idea of human development as a tragedy from the perspective of capitalist power Although the argument of this book draws heavily on critical political economy the analysis considers interdisciplinary literature in an effort to explore how major revolutions have transformed human social relations of power and created certain path dependencies that may ultimately lead to our downfall as a species Intellectually sophisticated and readable this book offers a provocative genealogy of capitalist power and the tragedy of human development

Muslim Perspectives on Islamophobia Zouhir Gabzi,2024-08-06 The Islamic positioning of Islamophobia is presented in this book Through Islamic or Muslim perspectives the book engages with various Islamic texts and discourses spoken and written emanating from preachers and scholars of Islam to discuss the points of convergence and divergence with the Western interpretation of the phenomenon The book aims to look at Islamophobia from a hitherto unexplored angle by first analyzing the points of convergence and divergence between the internal Muslim and external Western perspectives and then by

providing new approaches to curbing Islamophobia through a holistic spiritual dimension of Islam and cultural memory The book contends that the bridges of understanding between the East and the West can only be built if some of Islam's theological concepts such as the place of reason in Islam are reinterpreted by considering the Islamic perspectives While the book acknowledges previous work on Islamophobia it contributes to a deeper understanding of Islamophobia in its internal and external manifestations by considering the theoretical frameworks of racism and xenophobia Readers interested in Islamic studies and anti racism narratives would find this book's eclectic approach and balanced perspective of the phenomenon informative and enlightening
