Integration, Division of Behavioral and Social Sciences and Education, National Research Council, 1997-02-11 Despite the strong safety record of the national airspace system serious disruptions occasionally occur often as a result of outdated or failed equipment Under these circumstances safety relies on the skills of the controllers and pilots and on reducing the number of aircraft in the air The current and growing pressures to increase the capacity to handle a greater number of flights has led to a call for faster and more powerful equipment and for equipment that can take over some of the tasks now being performed by humans Increasing the role of automation in air traffic control may provide a more efficient system but will human controllers be able to effectively take over when problems occur This comprehensive volume provides a baseline of knowledge about the capabilities and limitations of humans relative to the variety of functions performed in air traffic control It focuses on balancing safety with the expeditious flow of air traffic identifying lessons from past air accidents The book discusses The function of the national airspace system and the procedures for hiring training and evaluating controllers Decisionmaking memory alertness vigilance sleep patterns during shift work communication and other factors in controllers performance Research on automation and human factors in air traffic control and incorporation of findings into the system The Federal Aviation Administration's management of the air traffic control system and its dual mandate to promote safety and the development of air commerce This book also offers recommendations for evaluation the human role in automated air traffic control systems and for managing the introduction of automation into current facilities and operations It will be of interest to anyone concerned about air safety policymakers regulators air traffic managers and controllers airline officials and passenger advocates Urban Design and the British Urban Renaissance John Punter, 2009-10-01 Are Britain's cities attractive places in which to live work and play Asking that question this is a critical review of how the design dimension of the Urban Renaissance strategy was developed and applied based on expert academic assessments of progress in Britain's thirteen largest cities The case studies are preceded by a dissection of New Labour's renaissance agenda and concluded by a

synthesis of achievements and failings Exploring the implications of this strategy for the future of urban planning and design this is a must read for students practitioners of these subjects and for all those who wish to improve the quality of the British urban environment Instrumentation in the Power Industry ,1977 **Chemical and Process Plant Commissioning Handbook** Martin Killcross,2011-11-04 This is a guide and reference to preparing a systematic methodology for converting a newly constructed plant as well as streamlining equipment into an operational process unit It includes downloadable commissioning process checklists that comply with industry standard best practice which readers can adapt for their own situations Power Plant Equipment Design Evans C. Goodling,1993 Publications of the National Bureau of Standards United States. National Bureau of Standards,1983 Planning for Tall Buildings Michael J. Short,2012 In a time of recession the challenge of building and planning for tall buildings has become even more complex the economics of development legislative and planning frameworks and the local politics of development must be navigated by those wishing to design and construct new tall buildings which fit within the fabric of their host cities This book is a timely contribution to the debate about new tall buildings and their role and effect on our cities It is divided into two main parts In part one the relationship between tall buildings and planning is outlined followed by an exploration of the impacts that construction of tall buildings can have It focuses in particular on the conservation debates that proposals for new tall buildings raise The first part ends with an analysis of the way in which planning strategies have evolved to deal with the unique consequences of tall buildings on their urban locations The second part of the book focuses on seven examples of medium sized cities dealing with planning and conservation issues and implications that arise from tall buildings These have been chosen to reflect a wide range of methods to either encourage or to control tall buildings that cities are deploying The case studies come from across the western world covering England Manchester Liverpool Newcastle and Birmingham Norway Oslo Ireland Dublin and Canada Vancouver and represent a broad spectrum of approaches to dealing with this issue In drawing together the experiences of these varied cities the book contributes to the ongoing debate about the role of the tall building in our cities their potential impacts and experiences of those who use and inhabit them The conclusions outline how cities should approach the strategic planning of tall buildings as well as how they should deal with the consequences of individual buildings particularly on the built heritage **Publications of the National Bureau of Standards ...
