on tuberculosis data generation and use. Module 1. Tuberculosis surveillance World Health Organization,2024-04-29

Since 1995 WHO has ensured a consistent approach to national regional and global TB surveillance by providing standardized definitions forms and registers for the recording and reporting of individual level and aggregated data about people diagnosed with and treated for TB which are used worldwide This standardization has facilitated the regular reporting of TB data to WHO from 215 countries and areas in annual rounds of global TB data collection with findings published in an annual WHO global TB report since 1997 and data made publicly available via the online WHO global TB database The goal of this 2024 edition of WHO guidance on TB surveillance following the last major update published in 2013 is to ensure the continued worldwide standardization of TB surveillance in the context of the WHO End TB Strategy the latest WHO guidelines on TB screening prevention diagnosis and treatment and commitments made at the 2023 UN high level meeting on TB while also promoting the establishment or strengthening of digital case based TB surveillance that is integrated within the overall public health architecture This 2024 edition provides a comprehensive and consolidated package bringing together both updated guidance as well as within web annexes closely related WHO products tools and documentation related to TB surveillance The web annexes and associated links to them are listed below The package was informed by and includes a summary of lessons learned about TB surveillance during more than 100 national TB epidemiological reviews conducted since 2013 *WHO operational handbook on tuberculosis. Module 3* World Health Organization,2024-03-15 The WHO operational handbook on tuberculosis Module 3 Diagnosis Rapid diagnostics for tuberculosis detection third edition is

the latest edition replacing the one issued in 2021 A new class of technologies for drug susceptibility testing is endorsed by WHO and included in this edition targeted next generation sequencing The operational handbook aims at facilitating the implementation of the WHO recommendations by the Member States technical partners and others involved in managing patients with TB and DR TB It provides practical information on existing and new tests recommended by WHO step by step advice on implementing and scale up testing to achieve local and national impact and lastly model diagnostic algorithms which are updated to incorporate the latest recommendations An overview of budgetary considerations and information sheets on each of the newly recommended tests is provided The class of targeted next generation sequencing is recommended for the detection of resistance to a number of first and second line anti TB drugs rather than culture based phenotypic drug susceptibility testing The recommendations will open for faster detection of resistance to a range of anti TB drugs directly from sputum samples Tuberculosis Giovanni Battista Migliori,Graham Bothamley,Raquel Duarte,Adrian Rendon,2018-12-01 With over 10 million new TB cases and 1 6 million deaths TB is a global health priority Multidrug resistant TB is of particular concern to both clinicians and national TB programmes in 2017 there were 558 000 new rifampicin resistant cases and 460 000 confirmed multidrug resistant TB cases Despite extensive investigation over the years there is still a great deal to learn about the prevention diagnosis and treatment of TB This Monograph brings together chapters from global TB experts and begins with a patients perspective that sets the tone The following chapters cover the history of TB epidemiology strategies for control and elimination clinical and laboratory diagnosis imaging treatment and drugs TB in children and different patient populations comorbidities clinical cases and much more Tuberculosis E-Book H. Simon Schaaf,Alimuddin Zumla,2009-03-24 This book provides all the vital information you need to know about tuberculosis especially in the face of drug resistant strains of the disease Coverage includes which patient populations face an elevated risk of infection as well as which therapies are appropriate and how to correctly monitor ongoing treatment so that patients are cured Properly administer screening tests interpret their results and identify manifestations of the disease with authoritative guidance from expert clinicians from around the world Discusses screening tests for tuberculosis so you can interpret their results and identify not only common manifestations of the disease but also those that are comparatively rare such as tuberculosis in pregnant women Covers all clinical aspects of tuberculosis in children including current practices on managing those infected with HIV Provides details on how best to interact with the public health system in both industrialized and developing countries Addresses the social aspects of tuberculosis and presents the latest advances on new and potential vaccines against tuberculosis Offers the expertise of internationally recognized tuberculosis clinicians to provide you with well rounded global coverage Features numerous illustrations to provide clear and detailed depictions of rare manifestations of tuberculosis **WHO consolidated guidelines on tuberculosis. Module 4** World Health Organization,2025-03-14 The World Health Organization s Global Programme on Tuberculosis Lung Health WHO GTB has

integrated all existing recommendations into a single unified set of consolidated tuberculosis TB guidelines These guidelines are organized into modules each tailored to specific programmatic areas Module 4 Treatment and care encompass all current recommendations for managing drug susceptible and drug resistant TB alongside patient care and support strategies Developed according to WHO's rigorous standards the guidelines rely on the latest evidence reviews and the GRADE methodology to evaluate evidence quality and determine the strength of each recommendation Primarily aimed at health policymakers and National TB Programme NTP managers they also support healthcare providers and technical organizations engaged in TB care An operational handbook accompanies the guidelines providing practical advice for large scale implementation
