Anisin, 2021-11-18 Mass Shootings and Civilian Armament provides the first comprehensive multi methodological analysis of

the relationship between mass shootings and firearm purchases as proxied by background checks in the US on national level data from 1999 2020 Since 1994 the number of civilian owned firearms in the US has doubled to around 398 million while the population only grew by 70 million On average mass shootings have occurred once every two weeks over the last decade which is a major factor behind why social scientists have started to ask whether mass shootings play a causative role in civilian decisions to purchase guns Utilizing a multi methodological approach featuring quantitative comparative configurational and qualitative methods this book puts forward a theoretical framework and argues that mass shootings do increase civilian armament but that this repetitious effect is historically contingent asymmetric and non linear Particular types of mass shootings are hypothesized to have driven and continue to bring about increased levels of civilian firearm purchases through different pathways and combinations of variables those that feature high fatality counts arise in areas of cultural importance are ideologically motivated First inquiry into background check data 1999 2020 and data on 213 mass shootings and attempted mass shootings is carried out to find out which shootings as well as controls are significantly correlated with background check increases Second the findings are utilized in a theoretically driven comparative configurational assessment to test if the noted theoretical pathways are associated with the outcome of increased post shooting armament Third the empirical analyses are complimented by three case studies the 2011 Gabrielle Giffords shooting illustrative of the high fatality pathway the 2012 Colorado movie theater shooting illustrative of the cultural pathway and the 2015 Charleston Church shooting illustrative of the ideologically driven pathway Interdisciplinary in nature Mass Shootings and Civilian Armament will not only be of great interest to scholars of Criminology but will also speak to sociologists economists public policy scholars political scientists historians as well as cultural studies and American studies scholars

Guns and Values Dylan S. McLean,Anthony K. Fleming,2023-07-24

The American gun control debate is best understood as a battle in a war over the influence of individualism on American culture politics and policy This book demonstrates that the gun debate is fundamentally about values Specifically it is about what we value most private rights or the public good This helps explain why the technical empirical or legalistic arguments we hear aren't persuasive A review of scholarly literature on both the politics of gun control and American political culture finds an American bias toward an individualism that embraces personal rights We argue that this bias stacks the deck against gun control Interviews we conducted with activists show that support for or opposition to gun control is linked to concern for the public or private good Finally we trace the federal gun control debate in Washington from the 1960s to 2010s to show the ebbs and flows of individualism's influence

Utter, 2015-12-01 This three volume set examines various approaches to firearms including constitutional and legal issues public health and criminal justice concerns and perspectives on personal safety and self defense Recent mass shootings have led to renewed calls for additional legislation at the state and federal levels to address gun access and control In this hard hitting compilation experts delve into various aspects of firearms in America from gun control and gun rights to militia movements to school related shootings and to the recent trends in gun ownership by women Authors from varied backgrounds and viewpoints share their perspectives on the pros and cons of firearm ownership as all of the following a constitutional right a key instrument of self defense a guarantee of political freedoms and as a major factor in crime and personal injury The reference is divided into three volumes The first volume covers firearm history legislation and policy the second volume explores public opinion gun ownership trends international laws and self defense and the third considers popular debates about firearm policy including concealed carry of firearms terrorism and the ownership of firearms background checks for purchasing guns and stand your ground laws The work concludes with an informed debate on gun policy between Richard Feldman president of the Independent Firearm Owners and Paul Helmke former president of the Brady Campaign to Prevent Gun Violence

Weapons Law in Western Europe, 1550-2020 Gunner Lind, 2024-12-09 This book is a transnational history of European weapons law that utilizes the law and primary sources to trace the development from early portable firearms to modern day weapons Challenging many conventional assumptions this book establishes that weapons control in the current sense is a new phenomenon Control with possession only became dominant between 1918 and 1939 thereby establishing a high degree of uniformity for the first time Weapons law is old in Western Europe but only as a palette of possible solutions Possession control triumphed as a tool against Communist and Fascist attacks on democracy and remained as an instrument against crime and accidents It is argued that previously the laws on possession furthered rather than hindered ownership For centuries governments sought security by encouraging trusted men to arm themselves rather than disarming the suspect Legislators used a range of carrying restrictions sometimes many but mostly few as a tool against armed crime The author examines attitudes and policies towards power law violence social hierarchy national defence and civic freedom This volume

offers historians and social scientists a new perspective on the long term development of Western European states and societies and it will be of value to undergraduate and postgraduate students of history sociology and politics

Kohn provides us with a lively and untainted portrait of American gun enthusiasts **Gun Control in the United States**

Gregg Lee Carter, 2017-01-23 This up to date second edition work will stimulate and clarify readers thinking on the key issues surrounding guns in the United States especially on the debate over gun control Most public debate and discussion about guns in U S society is rarely guided by research not surprising as most individuals have a personal opinion on this highly inflammatory topic based on their upbringing or personal experiences Additionally most research about gun use in America is confusing and contradictory making it difficult for citizens to gain much from their attempts to investigate the topic objectively This book offers concise understandable coverage of all aspects of the issue including incidence of gun violence gun control gun rights government regulation legislation and court decisions gun organizations for gun control and for gun rights gun enthusiast subcultures for example hunters target shooters and collectors and U S attitudes toward guns Many of the covered topics are placed in historical and cross cultural perspective The new edition of Gun Control in the United States A Reference Handbook enables the reader to navigate and interpret the research to become sufficiently educated on any specific aspect of the gun issue to make an informed decision for example whether to support stricter or more lenient gun control whether to become a gun owner whether to support a particular political party or candidate or whether to develop or to refine a particular philosophy regarding guns Other aspects of the contemporary gun debate that are addressed include whether the Supreme Court's ruling that the Second Amendment guarantees an individual right will withstand future challenges whether the strong gun regulations used in Europe would be effective and applicable in reducing gun violence in the United States and whether the diversity explosion created by the high rate of immigration from countries where guns are strictly controlled will soon change the politics of the U S gun control debate **Tales from the Sausage**

Factory Daniel L. Feldman, Gerald Benjamin, 2010-09-01 Laws are like sausages Otto von Bismarck is said to have remarked It is better not to see them being made Even among sausage factories New York State's legislature is notoriously dysfunctional but as Tales from the Sausage Factory reminds us this was not always the case Indeed in the early 1980s New York's legislature was a model of professionalism Cowritten by former state legislator Daniel Feldman and political scientist Gerald Benjamin Tales from the Sausage Factory offers an up close look at how law and public policy are made in New York State Drawing on Feldman's experiences as a member of the New York State Assembly from 1981 to 1998 the book focuses on four major battles over public safety policy in the 1980s and 1990s organized crime control the Rockefeller drug laws sex offender notification and gun control Not afraid to name names along the way Feldman and Benjamin show how politics

works in New York State and how major public policy questions are decided both in the legislature and the courts as well as how New York's legislature might rise above its present dysfunction to recover the professionalism it once had. At a time when frustration with state government is at an all time high, *Tales from the Sausage Factory* is a much needed reminder of what we can and should expect from our state legislators. *Contemporary American Politics and Society* Robert Singh, 2003-02-24

For those who still believe that politics is normally naturally about economics, Rob Singh has gathered the evidence and dialed the wake up call. Seven major instances of an ongoing culture war meet a common analytic framework here in a lively and informative fashion. Byron E. Shafer, University of Wisconsin. **Politics of Gun Control** Robert J. Spitzer, 2015-11-17

The new edition of this classic text covers the latest developments in American gun policy including shooting incidents plaguing the American landscape especially Sandy Hook, the Colorado theatre shootings and the tragic death of Trayvon Martin, placing them in context with similar recent events. The incidents described in the book sparked a wave of gun control legislation at local, state and national levels, some of which was successful, some doomed and all controversial. At the national level, President Obama put his political capital on the line to push for new gun control measures, only to see them shot down by Congress. Robert J. Spitzer has long been a recognised authority on gun control and gun policy. His even handed treatment of the issue as both a member of the NRA and the Brady Center continues to compel national and international interest, including interviews by the likes of Terry Gross, Tom Ashbrook and Diane Rehm. This sixth edition of *The Politics of Gun Control* provides the reader with up to date data and coverage of gun ownership, gun deaths, school shootings, border patrols and new topics including social media, stand your ground laws, magazine regulation and shooting related mental health initiatives. **The Politics of Gun Control** Robert J. Spitzer, 2023-08-10

Since its initial publication, this book has become the classic work on every important element of the tumultuous national gun debate in America. This new edition brings together the latest developments and research in gun politics, policy, law, history and criminology to provide a comprehensive and accessible source widely used by scholars, journalists and in classrooms. In this era of polarized politics, this book provides a unique window into how and why that polarization drives our politics. Among the new topics covered in this edition are the Bipartisan Safer Communities Act, new Supreme Court protections for concealed carry permits and the impacts of the COVID-19 pandemic on gun violence and policy. New to the Ninth Edition: Examines current gun control legislation at both state and federal levels, particularly the circumstances that lead to the passage of the Bipartisan Safer Communities Act in 2022. Introduces the new constitutional standards for gun control legislation set by the controversial pro Second Amendment Supreme Court ruling in *New York State Rifle Pistol Association v. Bruen* (2022). Provides expanded and updated consideration on related issues including the rise of gun carry movements on college campuses, attempts to regulate ghost guns, bump stocks and guns with high capacity magazines, 50 caliber sniper rifles and the impacts of the COVID-19 pandemic, the January 6 Capitol Attack and the Black Lives Matter movement on contemporary gun control.

debates Tracks the financial political and legal crises that threaten the dominance of the National Rifle Association and examines the rise of new gun rights groups such as the National Association for Gun Rights Presents new and updated statistical research on gun ownership in America gun related fatalities public opinion support of red flag laws and other gun control measures Incorporates new pedagogical features of chapter summaries and discussion questions into each chapter

Firearms control Great Britain: Parliament: House of Commons: Home Affairs Committee,2010-12-20 The Home Affairs Committee reports that well designed legislation which regulates and restricts the legal supply of firearms can help to reduce gun crime The committee recognises that thousands of people use firearms responsibly for recreation and in their work It has no intention of restricting such activity However the committee today concludes that interpreting and applying the current 34 pieces of legislation governing the control of firearms places an onerous burden on the police and on members of the public who wish to abide by the law because it is so complex and confused In particular the committee recommends introducing one licensing system to cover all firearms which require a licence and identifies age restrictions on firearms use as a particular area of uncertainty Although the majority of firearms related crimes are not committed with licensed firearms the committee is also concerned about the use of legally owned weapons in domestic shootings including those related to domestic abuse The Committee has several recommendations including a review of the minimum age limits on the use of firearms and eligibility for firearms certificates recommends tighter restrictions and clearer guidance to the police on the granting of firearms and shotgun licences to individuals who have engaged in criminal activity considering requiring the police to consult the domestic partners of licence applicants in making the decision as to whether to grant a licence suggests that the Government considers requiring advocates raising the fees charged to applicants so that it covers the costs of licensing to ensure that police spending cuts do not jeopardise the rigour of the licensing process Finally the committee was concerned at evidence of the significant criminal threat posed by reactivated and converted firearms in response to tighter regulations on genuine lethal weapons
