China's Industrial Policies and the Global Business Revolution

Ling Liu, 2005-07-05 As China has blended market reforms with comprehensive industrial policies most research has focused on the national government's strategies for economic growth. However, one of the unique characteristics of industrial policy in China is that it involves government intervention at all levels from the political elite all the way down to village leaders. This book focuses on the domestic appliance industry and China's three major business groups in this area: Haier, Hisense, and Aucma. The Haier Group in particular is one of the most successful and competitive enterprises in China and is very well placed to compete globally as the Chinese economy becomes more integrated with the world trading system. This volume shows how industrial policy is formulated at the national level and implemented at the local level and examines how local government frequently intervenes in local enterprises' business strategy and management. Of practical importance, this book provides academics, business people, and policy makers with valuable insights into the development process and a concrete understanding of the challenges faced in the global business revolution by one of the world's most dynamic economies.

China as the World Factory Kevin H. Zhang, 2006-09-27 In this important book Kevin Zhang brings together an international team of contributors to analyze how China has grown and developed in order to become the world's fourth largest exporting nation.

The Jubak Picks Jim Jubak, 2008-12-30 The Investing Strategy for All Seasons. The Jubak Picks enables you to play great offense and great defense to make money in the stock market in good times, to protect yourself during downturns, and to reap the biggest profits when the good times return. In good times, Jubak's strategy beats the market, delivering an amazing return of 360 percent over an eleven-year period. Compare that to the S&P 500 Stock Index return of 68 percent, and we are talking about real money in your pocket. But times aren't always good, and no investor can make money all the time. When stocks plunge during a grinding bear market, you need a strategy for playing great defense that preserves capital so you can pounce when good buying opportunities present themselves. And best of all, Jubak's strategy tells what ten trends and fifty stocks will make you the most money when the market rebounds. Jim Jubak's top-down stock picking method is based on being in the right asset at the right time, ensuring that your portfolio is composed of stocks with the wind at their back and that are trending upward. He shows how to find the best stocks by first understanding ten macro trends changing the world, including the economies of Brazil, Russia, Vietnam, India, China, and the rest of the gang driving global demand. The return of inflation and the end of the thirty-year era of low prices. The rising tide of retirement money in an older and wealthier world and the crucial need for companies that can properly manage it. The commodities crunch in a world ever more hungry for natural resources. The end of cheap oil. Food as the new oil. The decline in global financial stability and the increasing value of safe investing havens. The world finally getting serious about the environment and global warming. Why
