Ekelund Jr., John D. Jackson, Robert D. Tollison, 2017-07-03 The Economics of American Art analyzes the most pervasive economic issues facing the art world applied to the whole spectrum of American art Both practical and accessible this book will be essential for collectors auction houses American art experts of all kinds museums gallery owners and not least by economists with continuing scholarly interests in these matters *Economic Development, Integration, and Morality in Asia and the Americas* Donald C. to the fields of art history art sociology and cultural studies *Museum Marketization* Karin M. Ekström, 2019-12-06 This wide ranging book explores the impact of marketization on the creative industries With critical perspectives from a variety of disciplines and global experts numerous examples from international cultural institutions are employed to illuminate the topic Culture and business have become increasingly intertwined and cultural institutions need to be aware of their place in the market Commercial awareness which was previously disparaged is now seen as a legitimate and necessary response to increased competition enhancing experience increasing accessibility broadening inclusivity and sustainable futures with diminishing funding The contributions to this book highlight that marketing public relations sponsorship and fundraising have become integral to the survival of many museums galleries and events Of interest to students and scholars across topics such as arts marketing arts administration heritage marketing and museum studies the book is also insightful for reflective practitioners in the creative sector *Sublime Economy* Jack Amariglio, Joseph W. Childers, Stephen E.

Cullenberg, 2008-11-25 Over the last two centuries artists critics philosophers and theorists have contributed significantly to such representations of the economy as sublime It might even be said that much of the emergence of a distinctly modern art in the West is inextricably linked to the perception of art's own autonomy and therefore its privileged mostly critical gaze at the terrible mixture of wonder and horror of capitalist economic practices and institutions The premise of this collection is that despite this perceptual sharing sublime economy has yet to be investigated in a purely cross disciplinary way *Sublime Economy* seeks to map this critical territory by exploring the ways diverse concepts of economy and economic value have been culturally constituted and disseminated through modern art and cultural practice Comprising of 14 individual essays along with an editors introduction *Sublime Economy* draws together work from some of the leading scholars in the several fields currently exploring the intersection of economic and aesthetic practices and discourses A pressing issue of this cross disciplinary conversation is to discern how artists writers and cultural scholars constructions of distinct conceptions of economic value as pertains to aesthetic objects as well as to more everyday objects and relations of mass consumption have contributed to the ways value functions in and across disparate discourses Thus this book looks at how cultural critics and theorists have put forward working notions of economic value that have regularities and effects similar to those of the expert conceptions and discourses about value that have been the preserve of professional economists **Delirium and**

Resistance Gregory Sholette, 2017-04-20 In the aftermath of the 2016 US elections Brexit and a global upsurge of nationalist populism it is evident that the delirium and the crisis of neoliberal capitalism is now the delirium and crisis of liberal democracy and its culture And though capitalist crisis does not begin within art art can reflect and amplify its effects to positive and negative ends In this follow up to his influential 2010 book *Dark Matter Art and Politics in the Age of Enterprise Culture* Sholette engages in critical dialogue with artists collectives counter institutions and activist groups to offer an insightful firsthand account of the relationship between politics and art in neoliberal society Sholette lays out clear examples

of art's deep involvement in capitalism the dizzying prices achieved by artists who pander to the financial elite the proliferation of museums that contribute to global competition between cities in order to attract capital and the strange relationship between art and rampant gentrification that restructures the urban landscape With a preface by noted author Lucy R Lippard and an introduction by theorist Kim Charnley *Delirium and Resistance* draws on over thirty years of critical debates and practices both in and beyond the art world to historicize and advocate for the art activist tradition that radically and at times deliriously entangles the visual arts with political struggles

Art Collecting and Gifts to Museums Paul van der Grijp, 2024-12-06 *Art Collecting and Gifts to Museums* questions why private collectors donate their collection or parts of it to museums and examines what the implications of this gifting process might be Presenting case studies from Europe North America East Asia and the South Pacific this book is concerned with both elite and popular collections and examines the act of donating art from the collector's point of view Demonstrating that art museums depend on donations from private collectors Paul van der Grijp emphasizes that it is crucial to understand the psychological sociological economic and educational motivations for gifting works of art to institutions Taken together the chapters argue that collectors donate to museums because the latter represent an imagined community to whom those collectors would like to bestow a sacred gift Private collectors are Van der Grijp maintains motivated to ensure the immortality of their collections and ultimately to preserve some memory of their own lives in the process *Art Collecting and Gifts to Museums* will be of interest to researchers and students engaged in the study of museums culture art anthropology history and sociology

Markets in Fashion Patrik Aspers, 2012-10-02 Interest in contemporary cultural industries has grown in the past decade as they take on a greater significance in our increasingly consumer led society Focusing on the world of fashion photography this book presents an interdisciplinary approach in which this and other aesthetic markets such as advertising modelling art music and more can be viewed The main thrust of this groundbreaking book is in developing a theory for these cultural markets characterized by insecurity and where status and aesthetic diversity generate order and price differentiation In these industries services and products are offered that are a mix of the aesthetic and the economic and for fashion photographers such as those studied here it is necessary to carefully position themselves in the market by developing unique photographic styles and separating themselves from competitors Yet the markets in which these industries operate differ from the type of exchange markets depicted by neoclassical economists and therefore cannot be considered using such modes of analysis Instead Aspers conducts his study using empirical phenomenology an original approach presented here for the first time which can be easily used in other empirical studies He draws on original empirical material participant observation and interviews generated in New York and Stockholm which bring a depth of analysis and a relevance to this book which academics researchers and those with a vested interest in such industries will value Written by one of the world's brightest young economic sociologists this fascinating book previously published in Sweden and enthusiastically received is endorsed by recognized industry

of the place of contemporary art galleries and gallerists especially within the art markets of Europe and the United States. Based on the author's field research carried out for over a decade and combining ethnographic material with quantitative data, the book reveals the major role galleries play in the creation of art value. Despite being pillars of the art market, there has been very little in-depth research on galleries especially when compared with the analysis of artists, critics, and dealers. Written by a sociologist who has spent a decade as an art critic, the book builds on work conducted by art historian and sociologist Raymonde Moulin from the 1960s to the 1990s. Drawing on ethnographic observations and interviews with those working in the field today, it provides a thorough and up-to-date analysis of what contemporary art galleries really are, the spaces they occupy both physically and online, their position within gallery districts, their relation to art fairs and biennials, and how friendship with clients is built and trends within the business in turn illuminating the hierarchized structure of the sector. The book concludes by addressing a significant gap in data on the art market by providing a sociological ranking of international contemporary art galleries. Offering a detailed analysis to a topic that has never been fully studied, *The Social World of Galleries* is essential reading for scholars and students of art sociology, art history, and art business, as well as gallerists, collectors, or art lovers and artists themselves.
