A subject index is included. National Evaluation of the Even Start Family Literacy Program, 1995. National Evaluation of the Even Start Family Literacy Program. Robert G. St. Pierre, 1995. *Play = Learning*. Dorothy Singer, Roberta Michnick Golinkoff, Kathy Hirsh-Pasek, 2006-08-24. In *Play Learning*, top experts in child development and learning contend that in over-emphasizing academic achievement, our culture has forgotten about the importance of play for children's development. Early Childhood Curriculum. Nancy Amanda Branscombe, Jan Gunnels Burcham, Kathryn Castle, Elaine Surbeck, 2013-07-24. Through its unique integration of curriculum and learning principles, *Early Childhood Curriculum: A Constructivist Perspective*, 2nd Edition, fosters authentic developmentally appropriate practice for both preschool and early elementary classrooms. The constructivist format of this book encourages active involvement on the part of readers by asking them to observe, question, reflect, research, and analyze, thus allowing readers to create their own knowledge through their responses and actions. *Early Childhood Curriculum* examines curricular goals such as autonomy, development, and problem solving, and links those goals with constructivist principles of learning. It explores ways teachers can create meaningful learning environments and choose curriculum tasks appropriately in all content areas that are linked to the learning and development needs of young children. The text provides a wealth of practical detail about implementing constructivist curriculum as the authors discuss classroom climate and management, room design, play, and cooperative learning among other topics. The book also includes information about how teachers can meet required mandates and national and state standards in appropriate ways as they plan their curriculum and examines the early childhood educator's role with community agencies, reform, and legal mandates and public relations. **Special Features:** Curriculum Strategies highlight models for developing curriculum, including projects, curricular alignment, integration of various subject matter areas, and types of knowledge. Constructions promote problem solving by allowing students to explore, revisit, examine, and learn from first-hand experience. Multiple Perspectives from the Field provide interviews with teachers and other early childhood professionals, offering students a realistic look at the profession from a diverse group of educators. Teacher Dialogues explore a wide range of student concerns, including curriculum learning.

Knowledge under Construction Daniel Ness,Stephen J. Farenga,2007-03-26 Knowledge under Construction investigates how young children develop spatial geometric and scientific thinking skills particularly those associated with architecture Based on original research and analysis of videotapes of children s play with blocks the authors findings suggest that such play is anything but pointless Their conclusions fill in gaps in our current understanding of how children learn to think spatially and scientifically even while challenging portions of that understanding including some of Piaget s thesis about the primacy of topological space in children s learning A system of measurement developed to identify and categorize children s spontaneous behavior at play allows adults to observe patterns of behavior as children play and record the development of process skills and cognitive abilities enhancing our understanding of how children begin to learn about space and architectural relationships The book also examines the educational implications of our enhanced understanding One possible development is a new alternative way to measure cognitive abilities and development in children based on their work with blocks
