Understanding Extreme Sports: A Psychological Perspective Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme sports with particular attention paid to the examination of motivations for initial participation continued participation effective performance and outcomes from participation References Brymer E Schweitzer R 2017a Phenomenology and the extreme sports experience NY Routledge Brymer E Schweitzer R D 2017b Evoking the Ineffable The phenomenology of extreme sports Psychology of Consciousness Theory Research and Practice 4 1 63 74 Giannoulakis C

Hidden in History: The Untold Stories of Female Explorers and Adventurers Danielle Thorne,2019-12-30 In Hidden in
History The Untold Stories of Female Explorers and Adventurers travel the globe and history While it s fairly common to have
women researchers pilots and captains in the 21st century this was not always the case Exploring and adventuring even in
the name of science and research were privileged activities reserved solely for men But some women just couldn t stay put
even when faced with the harsh resistance of those who favored the norm These women broke with convention and trekked
into the unknown paving the way for women of today to seek adventure as they see fit In 1766 Jeanne Baret performed
botanical research as she made a complete voyage around the world making her the first woman ever recorded to do so

Marguerite Hay Drummond Hay became the first woman to circumnavigate the globe from the sky when she flew around the world in a zeppelin prior to World War II Louise Arner Boyd traveled to the Arctic in 1926 a hard journey even in modern times Now we have women like Sylvia Earle a world renowned oceanographer and the first woman to walk on the ocean floor and Barbara Hillary the first woman of color to travel to both the North and the South Pole With this installment in the Hidden in History series readers can explore for themselves the exciting stories harrowing adventures and meaningful research conducted by these daring women No longer forgotten in the past the adventurous women of yesterday can once again inspire tomorrow's explorers to chart their own expeditions into the great unknown Thin Air Greg Child,1998
