Higher Ed Inc The Rise Of The For Profit University:

Higher Ed, Inc. Richard S. Ruch, 2003-08-11 Winner of the 2002 Alice L Beeman Research Award for Outstanding Writing about Communications from the Council for Advancement and Support of Education Among higher education institutions in the United States for profit colleges and universities have steadily captured a larger share of the student market A recent trend at for profit institutions is the coupling of job training with accredited academic programs that offer traditional baccalaureate professional and graduate degrees Richard Ruch with administrative experience in both the nonprofit and for profit sectors of higher education takes us inside these new for profit institutions describing who teaches there who enrolls and why and how the for profits are managed and by whom He analyzes their different structures services and outlook on higher learning and training and explains in detail how they make profits from tuition income In *Higher Ed Inc* Ruch opens up the discussion about for profit higher education from the perspective of a participant observer Focusing on five providers the Apollo Group the University of Phoenix Argosy Education Group the American Schools of Professional Psychology DeVry Inc DeVry Institutes of Technology Education Management Corporation the Art Institutes International and Strayer Education Strayer University he conveys for the first time what it feels like to be inside this new kind of American institution He is also candid about the less attractive aspects of the for profit colleges including what those who enroll may give up As Ruch makes clear the major for profit colleges and universities offer a different approach to higher education one that may be increasingly influential in the future

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country's flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country's existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the

people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes *Corporations and Citizenship* Greg Urban,2014-05-08 President Theodore Roosevelt once proclaimed Great corporations exist only because they are created and safeguarded by our institutions and it is therefore our right and duty to see that they work in harmony with those institutions But while corporations are ostensibly regulated by citizens through their governments the firms in turn regulate many aspects of social and political life for individuals beyond their own employees and the communities that support them Corporations are endowed with many of the same rights as citizens such as freedom of speech but are not themselves typically constituted around ideals of national belonging and democracy In the wake of the global financial collapse of 2008 the question of what relationship corporations should have to governing institutions has only increased in urgency As a democratically sanctioned social institution should a corporation operate primarily toward profit accumulation or should its proper goal be to provision society with needed goods and services *Corporations and Citizenship* addresses the role of modern for profit corporations as a distinctive kind of social formation within democratic national states Scholars of legal studies business ethics politics history and anthropology bring their perspectives to bear on particular case studies such as Enron and Wall Street as well as broader issues of belonging social responsibility for profit higher education and regulation Together these essays establish a complex and detailed understanding of the ways corporations contribute positively to human well being as well as the dangers that they pose Contributors Joel Bakan Jean Comaroff John Comaroff Cynthia Estlund Louis Galambos Rosalie Genova Peter Gourevitch Karen Ho Nien h Hsieh Walter Licht Jonathan R Macey Hirokazu Miyazaki Lynn Sharp Paine Katharina Pistor Amy J Sepinwall Jeffery Smith Jeffrey L Sturchio Greg Urban *Encyclopedia of Education and Human Development* Stephen J. Farenga,2005 Covers a broad range of topics within the fields of education and human development Includes the ways in which learners construct knowledge at the different stages of human development the educational tools used by teachers to teach and educational politics *Higher Education Management and Development in Central, Southern and Eastern Europe* Attila Pausits,Ada Pellert, **College Students and Their Environments** Cathy Akens,Raquel Wright-Mair,Joseph Martin Stevenson,2019-07-24 The best value that the reader will take from this book is the knowledge skills and wisdom offered by the editors and 26 chapter authors The book offers many unique features on how to create a college environment that fosters student learning growth development and supports student success The book approaches the college environment issue from a philosophical foundation and shows the reader what has made student affairs work increasingly complex By identifying some major shifts of student affairs work in history the text demonstrates how student affairs service providers became student affairs educators who actively shape the environment instead of being shaped or reactionary The book provides insights and implications on how the environmental

theories might inform practice and also recommends how to study campus environments Furthermore the text clarifies what student access is explores the primary frameworks used to boost student success and suggest what student affairs educators should consider when implementing student success initiatives Additionally the book addresses the intersection of professional competency areas through campus environment cultivation with social justice and inclusion for diverse student populations Particularly the book provides useful and practical examples of how faculty can work with graduate students in training to conduct an assessment of student needs and success This book is purposely written for those who are training to become student affairs educators and those who are newer in the profession It not only provides the reader with a theoretical framework but also some direction on how to create a college environment that is socially justice and inclusive

International Marketing of Higher Education Terry Wu,2016-09-15 This book examines both the theory and applications of marketing higher education in a global environment Universities and colleges face new challenges in student recruitment and international competition This book is designed to offer new insights into international marketing of higher education With declining domestic enrollments and continuing funding cuts many higher education institutions are exploring new ways to market and promote themselves to international students Higher education institutions view international students not only as a source of revenue but also as an integral part of an overall academic strategy While international students face many destination choices they normally choose universities and colleges in developed countries such as the US Canada UK Australia and New Zealand The international marketing of higher education is of growing importance to universities and colleges today

Education and Power in Contemporary Southeast Asia Azmil Tayeb,Rosalie Metro,Will Brehm,2023-07-18 This book focuses on education and power in Southeast Asia and analyzes the ways in which education has been instrumentalized by state non state and private actors across this diverse region The book looks at how countries in Southeast Asia respond to the endogenous and exogenous influences in shaping their education systems Chapters observe and study the interplay between education and power in Southeast Asia which offers varying political social cultural religious and economic diversities The political systems in Southeast Asia range from near consolidated democracy in Indonesia to illiberal democracy in Singapore and Thailand to the communist regime in Laos to absolute monarchy in Brunei Structured in three parts i centralization and decentralization ii privatization and marketization and iii equity and justice these themes are discussed in single country and or multi country studies in the Southeast Asian region Bringing together scholars from and focused on Southeast Asia this book fills a gap in the literature on education in Southeast Asia

Gendered Futures in Higher Education Becky Ropers-Huilman,2012-02-01 This volume addresses the ways in which gender takes shape in and is shaped by higher education environments Focusing on historical knowledge and contemporary experience the contributors identify several key gender issues affecting students faculty and leaders in higher education They examine such diverse topics as what lessons women s colleges have to offer violence on campus women faculty and part time employment and

intersecting identities of race and gender and they apply critical perspectives to suggest needed change While they may not agree on the necessary strategies to improve higher education environments they do agree that those environments are currently deeply and problematically gendered

Academic Freedom Under Siege Zhidong Hao, Peter Zabielskis, 2020-11-02 This book argues that academic freedom in higher education in East Asia the U S and Australia is under stress Academic freedom means freedom to teach research and serve in multiple political and social roles based on professional principles It is closely linked to shared governance in which academics participate in and influence decision making in core academic concerns such as choosing new faculty faculty promotion tenure decisions and the approval of new academic programs In different countries and regions the duress confronting academic freedom may come from different directions and the ability of faculty to share power can vary greatly In authoritarian mainland China it is mostly political and ideological controls that greatly affect academic freedom and shared governance is very much limited In semi democracies like Hong Kong and Macau and democracies like Taiwan Japan South Korea the U S and Australia corporatization and commercialization have had great impact on both academic freedom and shared governance The result is that the roles professors play within academia are continually being diminished and the academic profession is struggling to maintain its ground Similar developments are also occurring in Europe These developments should cause great concern to educators researchers and policymakers everywhere The authors collected here present attempts to learn from current practice in order to move policy into directions that will help protect higher education as a common good This book highlights the importance of academic freedom and provides insights into the ways it is being infringed both by commercialization and corporatization on the one hand and political repression on the other It vividly illustrates detailed case studies and empirical data that make it a compelling read Professor Ruth Hayhoe University of Toronto Canada Academic freedom is as important today as at any time in the last century The authors point out the challenges that academic freedom faces on a global scale The import of the book is in its comparative perspective steeped in data and analysis Thoughtful Cogent Compelling
