**Turning Average Instruction Into Great Instruction** John O'Connor, 2009-01-16 Turning Average Instruction into Great Instruction details a clear and concise approach to school improvement focusing school leaders on the critical factor that has the greatest impact on student achievement classroom instruction Decades of research demonstrate that what happens between teachers and students in our nation's classrooms has the greatest impact on how well those students learn The current trend in school reform is to tackle all aspects of a school in order to improve student achievement forcing school leaders to attempt to focus on the school culture use of materials community relations teachers pre service training the school's physical design classroom decorations and instruction Unfortunately such a wide scope leads to a lack of focus among school staff With his singular focus on classroom instruction what O'Connor suggests is an antithesis to that approach School leaders will develop a common understanding of the high impact instructional components that should be seen in

every classroom O Connor maps out how school leaders can align all personnel to systematically build training support and monitoring mechanisms that ensure that effective instruction becomes part of every classroom routine **Atlanta**

**Evaluation of Clinical Trials** Vinaya Manchaiah, Gerhard Andersson, Hueiming Liu, 2022-08-05 **The Impact of Mentoring African American Middle Grade Males** Linda W. Washington, 2012-10-12 This insightful book gives

suggestions on increasing academic rigor of the middle school male student increasing consistent student attendance and decreasing discipline referrals This book gives situational examples and possible suggestions to help single parents teachers administrators board members and the male student to overcome obstacles to be successful Washington believes that bonding should initially take place early in the relationship of the teacher to student and student to teacher Much like a client coming to a store for specific items the store owner has to get to know his customer in order to effectively serve this individual for continued customer satisfaction The same principles apply for teachers getting to know their students Oftentimes this notion is not developed because of constant new initiatives being introduced to teachers without lasting results Hence mentoring of students can eliminate many problems schools face Using the suggestions offered in this book will cause increase academic performance and attendance while decreasing discipline referrals tremendously
