days and a year has about 354 days The months of the Hijri calendar are Muharram Safar Rabi al awwal Rabi al thani Jumada al awwal Jumada al thani Rajab Sha ban Ramadan Shawwal Dhu al Qi dah and Dhu al Hijjah The Hijri calendar is a lunar calendar that begins with the exodus of the Prophet Muhammad from Mecca to Medina which is considered the year of the Hegira The year of the Hegira corresponds to the year 622 of the Common Era CE So if we are in 2023 of the common era we are in the year 1444 of the Hegira However it is important to note that the Hijri calendar is a lunar calendar and the dates of the Hijri calendar do not coincide exactly with those of the Gregorian calendar which is the most commonly used solar calendar in the world today The Hijri calendar was instituted by Caliph Omar in the seventh century CE and is used by Muslims to set the dates of religious festivals and ceremonies The dates of the Hijri calendar are about 11 days shorter than those of the Gregorian calendar which means that Muslim holidays move back 11 days each year compared to the Gregorian calendar The dates of the Muslim holidays are determined according to this calendar and can therefore vary from one year to another
