

PRECAUTIONS

PRECAUTIONS FOR ELECTRICAL SYSTEM

1. REMOVING THE BATTERY CABLE

⚠ WARNING

- Be sure to wait for at least ten minutes after the starter key is turned to "LOCK" position before you disconnect the battery terminals from the battery, as the vehicle data is recorded on ECU and DCU starts working for the exhaust gas after treatment after the starter key is turned to "LOCK" position. Otherwise, the vehicle data will not be recorded on ECU properly and DCU will not complete working properly, which may result in the malfunction of DPR system and DEF-SCR system.
- The MIL (malfunction indicator light) may come on when the starter key is turned to "ON" position again, even if you wait for at least ten minutes before disconnecting the battery terminals from the battery after the starter key is turned to "LOCK" position. In this case, use HINO DX II to clear the DTC (P204F and P068A), to turn off the MIL and to conduct DPR regeneration manually.

- (1) Before electrical system work, remove the cable from the minus terminal of the battery in order to avoid burning caused by short-circuiting.
- (2) To remove the battery cable, fully release the nut to avoid damage to the battery terminal. Never twist the terminal.

2. HANDLING OF ELECTRONIC PARTS

- (1) Never give an impact to electronic parts of a computer or relay.
- (2) Keep electronic parts away from high temperatures and humidity.
- (3) Never splash water onto electronic parts in washing the vehicle.
- (4) Do not remove the harness connector, electric component box, and cover except for repair and inspection.
If removal is necessary, pay attention that water and foreign matters do not attach or enter to the connector, terminals, electric component box, and cover.
In restoration, make sure there is no attachment or entry of water and foreign matters and mount them properly, because it causes degradation of waterproof function.

3. HANDLING OF WIRE HARNESS

- (1) Perform marking on a clamp and a clip and secure them in original position so that the wire harness will not interfere with the end and acute angle section of the body and a bolt.
- (2) To attach a part, take care not to bite the wire harness.
