My Cancer Journey - a Rendezvous with Myself Parul Banka, 2015-05-26 My book *My Cancer Journey A rendezvous with myself* is a candid narration of my encounter with breast cancer. It is the story of an ordinary woman who was put in extraordinary circumstances and who undertook her cancer journey with the utmost courage. This memoir is not just about describing a difficult medical condition. It is about going through the experience and emerging from it wiser and stronger. It is about using cancer as a life-changing experience despite all the trauma and the loss and the change needn't be for the worse. It is about understanding the choice that a human being has: the choice to accept what cannot be changed and to use one of the toughest fights of life to evolve into a better person irrespective of the prognosis. Pick up a copy to embark on a rendezvous with your inner self. A factual, informative and profound book truly from the heart. I highly recommend this book and it offers some important insights from holistic therapy. Lorraine Smillie, Homeopath and Holistic Healer, UK. Parul's account of her experience with breast cancer and what she found helpful will be a useful companion for other young women finding themselves in a similar situation. Dr Caroline Hoffman, OAM PhD, clinical and research director, The Haven, London. This book is a very personal and very honest story of survival from breast cancer. Parul has shown enormous courage to emerge as a strong, determined woman with everything to live for. Beverley van der Molen, Macmillan Information and Education Officer, Pauls Cancer Support Centre and St Georges University Hospitals NHS Foundation Trust and author of *Taking Control of Cancer*. **British Medical Journal**, 1882

It's in Your DNA Eugene Rosenberg, 2017-04-11 It's in Your DNA: From Discovery to Structure, Function and Role in Evolution. Cancer and Aging describes in a clear, approachable manner the progression of the experiments that eventually led to our current understanding of DNA. This fascinating work tells the whole story from the discovery of DNA and its structure, how it replicates, codes for proteins, and our current ability to analyze and manipulate it in genetic engineering, to begin to understand the central role of DNA in evolution, cancer, and aging. While telling the scientific story of DNA, this captivating treatise is further enhanced by brief sketches of the colorful lives and personalities of the key scientists and pioneers of DNA research. Major discoveries by Meischer, Darwin, and Mendel and their impacts are discussed, including the merging of the disciplines of genetics, evolutionary biology, and nucleic acid biochemistry, giving rise to molecular genetics. After tracing development of the gene concept, critical experiments are described, and a new biological paradigm, the hologenome concept of evolution, is introduced and described. The final two chapters of the work focus on DNA as it relates to cancer and gerontology. This book provides readers with much needed knowledge to help advance their understanding of the subject and stimulate further research. It will appeal to researchers, students, and others with diverse backgrounds within or beyond the life sciences, including those in biochemistry, genetics, molecular genetics, evolutionary biology, epidemiology, oncology, gerontology, cell biology, microbiology, and anyone interested in these mechanisms in life. Highlights the importance of DNA research to science and medicine. Explains in a simple but
