century artist into sharp focus Louise Bourgeois 1911 2010 was one of the most important artists of the twentieth century She is known for a body of work that spans sculpture painting and printmaking but eludes any aesthetic classification Her life and art were so intertwined that it is often difficult to tell them apart In her own words Sculpture is the body My body is the sculpture Marie Laure Bernadac s biography of Bourgeois traces the career of a great artist her training and her influences as it tells the story of an exceptional woman s life Featuring personal photographs as well as reproductions of her work this landmark publication is the first major biography to draw on the artist s unpublished personal archives including diaries correspondence and psychoanalytic writings as well as the many interviews she gave and the reminiscences of those who knew her Bernadac elucidates Bourgeois s friendships and rivalries with other major figures including sculptor Louise Nevelson and Museum of Modern Art director Alfred H Barr Jr She also draws on Bourgeois s well known fascination with psychoanalysis to explore the deeply autobiographical nature of her artwork This erudite and keenly insightful biography pays tribute to the talent of the artist and the complexity of the person

Textiles, Identity and Innovation: In Touch Gianni Montagna, Manuela Cristina Paulo Carvalho Figueiredo, 2020-05-19 D_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand study adapt and project them for the future It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way adapting them

to their objectives and research D_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations Present in all areas of knowledge the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge D_Tex proposes to promote discussion and knowledge in the different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge innovative and traditional techniques technological and innovative materials and methods but also new organization and service models different concepts and views on teaching With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other the research and practice of textiles was proposed by the D_TEX Textile Design Conference 2019 held June 19 21 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme In Touch where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers

Crafting Textiles in the Digital Age Nithikul Nimkulrat, Faith Kane, Kerry Walton, 2016-09-08 In an era of increasingly available digital resources many textile designers and makers find themselves at an interesting juncture between traditional craft processes and newer digital technologies Highly specialized craft design practitioners may now elect to make use of digital processes in their work but often choose not to abandon craft skills fundamental to their practice and aim to balance the complex connection between craft and digital processes The essays collected here consider this transition from the viewpoint of aesthetic opportunity arising in the textile designer's hands on experimentation with material and digital technologies available in the present Craft provides the foundations for thinking within the design and production of textiles and as such may provide some clues in the transition to creative and thoughtful use of current and future digital technologies Within the framework of current challenges relating to sustainable development globalization and economic constraints it is important to interrogate and question how we might go about using established and emerging technologies in textiles in a positive manner

Second Chance Ruth Rosengarten, 2022-08-23 In this intimate memoir Ruth Rosengarten explores the subject of evocative objects through a series of interconnected essays Evocative objects reflect our attitudes to our own lives and how we seek to display ourselves to ourselves They are therefore closely linked to our memories and how we filter process and reconstruct them Rosengarten explores the themes and associations invoked by her own evocative objects which are frequently shabby things of no material value They are importantly often objects that in their materiality bear traces of actions of something having been Through the associative pathways that these objects have paved she discusses her experiences with the losses she has undergone her family's migrations and what it means to be a childless woman This leads her to address the question of what will become of her storied objects and the memories attached to them when she is no longer in existence This memoir offers an

interdisciplinary approach to collecting and compiling fragments of one's life paying close attention to the evocative objects that embody us. In doing so these essays explore loss, memory, childlessness, longing, family history, literature and art theory through material entities which reveal the immaterial things at the heart of this study. This book is sure to be of interest to anyone stimulated by memory work and the relationship between humans and their possessions. **Razor Wire Women**

Jodie Michelle Lawston, Ashley E. Lucas, 2011-04-11 Offering nuanced portraits of women's lives inside razor wire and prison walls *Razor Wire Women* puts incarcerated women in dialogue with scholars, artists, educators and activists who live outside of prisons but work on issues connected to the prison industrial complex. Women make up the fastest growing group of the U.S. prison population yet prison scholarship largely overlooks the struggles of incarcerated women and their voices are often silenced both in and out of the prison infrastructure. From the vantage points of those both inside and outside of prisons this collection of essays and art illuminates many of the distinct experiences and concerns of incarcerated women including those of girls in prison, abuse and rape, the policing of women, incarcerated motherhood, mental health issues in prisons, incarcerated women's artistic and cultural production and prisons' impact on families' health and sexuality. Combining the transcendence, hope and clarity of art with powerful analytical and conceptual tools *Razor Wire Women* reveals the gendered dimensions of the incarceration now experienced by a growing number of women in the U.S. **Textile Collage** Mandy Pattullo, 2030-01-01

Textile artist and surface designer Mandy Pattullo marries fabric with collage techniques to produce beautiful pieces of art. In *Textile Collage* she shows a fresh way to use scraps and oddments of fabrics to create something unique and personal while also being economical, perfect for those who have hoarded bits of fabric trim and memory-filled domestic textiles over the years. Chapter one covers Materials: collecting and sourcing fabric including unpicking and storing found fabric. In chapter two, *Make*, Mandy guides you through all the artistic and creative elements that you need to consider to create a beautiful collage. The following chapter, *Portray*, looks at piecing together a collaged portrait, human or animal, showing the figurative approach in collage work that includes transfer images and using found photographs. In the chapter *Worn*, the collage technique is used to embellish skirts, jackets and accessories. The final chapter, *Book*, looks at the fabric book as a receptacle for textile collage with a range of approaches and forms explored. This is a wonderful resource for all textilers looking to make the most of the found fabrics they love and fully explore the technique of collage with textiles. **Slow Stitch** Claire

Wellesley-Smith, 2015-09-17 The pleasures to be had from slowing down can be many with connections to sustainability, simplicity, reflection and tuning into traditional and other multicultural textile traditions. *Slow Stitch* is a much needed guide to adopting a less-is-more approach, valuing quality over quantity and bringing a meaningful and thoughtful approach to textile practice. Claire Wellesley-Smith introduces a range of ways in which you can slow your textile work down including: Using simple techniques inspired by traditional practice including hand stitch rhythms; Reusing and re-inventing materials; reuse even old textile projects; Limiting your equipment; Mending revisited; practical and decorative techniques; Project ideas.

and resources that help towards making a more sustainable textile practice Richly illustrated throughout and showcasing work from the best textile artists who work in this way this is a truly inspirational book for those looking to reconnect with their craft and to find a new way of working
