The Marriage Clinic John M. Gottman, 2016-12-19 The Marriage Clinic presents a complete marital therapy program based on John Gottman's much heralded research on marital success and failure. Here one will find not only a wide range of succinct and useful assessment procedures but also a highly specific research-based and modularized treatment program. In addition, there are dozens of questionnaires and interview protocols to be used in both assessment and intervention. In prospective long-term research with over 700 couples, Gottman has discovered certain factors that distinguish happy stable couples from both unstable ultimately divorcing couples and stable but unhappy couples. These findings, which are explained here in understandable nontechnical language, form the basis of his Sound Marital House theory of marriage, which guides the new therapy. This therapy has two goals: changing the marital friendship and teaching couples to regulate conflict. Despite the high aims of much marital therapy, Gottman found that most marital conflicts involve fundamentally unresolvable relationship issues called perpetual problems. He shows how therapists can help spouses move from gridlock to dialogue on these issues. Solvable problems can be resolved more easily when the couple has a strong marital friendship. He gives therapists the tools to teach spouses five fundamental skills to develop and strengthen their friendship: softened start-up, accepting influence, repair, and de-escalation, compromise, and physiological soothing. Gottman compares his clinic to a restaurant where clients are offered a menu of treatment formats from psychoeducation for specific issues to extended therapy to repair a badly damaged marital friendship. Therapists too can choose among the questionnaires and strategies for those that fit the needs of particular couples. Whatever their choice, they will find that their practice is greatly enriched by the scientifically based offerings of The Marriage Clinic.

Summary of Julie Schwartz Gottman & John M. Gottman's 10 Principles for Doing Effective Couples Therapy (Norton Series on Interpersonal Neurobiology) Everest Media, 2022-04-26T22:59:00Z Please note: This is a companion version, not the original book. **Sample Book Insights** 1 The history of the psychotherapy field is one of scientific study. In the 1950s and 1960s, many brilliant thinkers, including Fritz Perls, R. D. Laing, B. F. Skinner, and Albert Ellis, broke free of Freudian constraints and created new therapies that focused on the here and now instead of the there and then. 2 The cornerstones of family therapy were the ideas of reciprocity and venting, which were based on the theory that healthy marriages are those where one

partner responds to the other's good behavior with his or her own good behavior in turn. But research has shown that airing resentments doesn't reduce anger; it increases it.³ The idea that emotion is the enemy that mucks up the marital work of problem solving is a myth. In fact, emotions are central to problem solving. Without access to our emotions, our rational processes are handicapped and we become little better than a conglomeration of arbitrary and random behaviors.⁴ John had a colleague, Robert Levenson, who was also studying relationships. They teamed up to study couples and found that it was extremely difficult to observe reliable patterns of behavior in just one person. But when they studied interactions in pairs, they found extremely reliable patterns.

The Science of Couples and Family Therapy John M. Gottman, Julie Schwartz Gottman, 2018-01-02 John and Julie Gottman, world renowned for bringing an evidence base to couples therapy, report here the results of a second empirical revolution in understanding couples and families. This change is not based on their guesswork but on state-of-the-art science. This book finally completes the old general systems theory of the 1960s which metaphorically described processes but did not actually research them. A new general systems theory and therapy is presented here, one which will have profound implications for powerful clinical work with both couples and families. This new theory is based on 45 years of careful basic scientific research with thousands of couples and families, including synchronized observational, interview, physiological, and questionnaire data. The Gottmans have studied some families for as long as 20 consecutive years. Their work has led to their highly replicated ability to precisely predict the future of relationships: relationship happiness and whether couples will divorce or not, with as much as 94% accuracy. Their empirical work has also led them to develop and test a theory of specifically what makes relationships work. Each construct in this theory is precise and measurable and it is all written about and described here. This book presents an original new way of understanding relationships and families. Both theoretical and highly practical, it will help clinicians become more effective in their everyday work.
