| 1. Would it make any sense to build space programs and rockets?     | That U.S. support them economically (training, fuel, etc.)                                 | None                                                                                                                                                   |
| 2. Would anyone benefit from the rockets and satellites they built? | They would surely produce satellites that were better. They would improve delivery of aid. | They were worried about the loss of U.S. technology when John F. Kennedy became president. They planned to use the rocket to deliver Chinese missiles. |
| 3. Would anyone disagree with this?                                 | Not Eisenhower.                                                                            | Others might be worried about our independence and our technology.                                                                                     |
| 4. Would the Soviets agree to limit their rockets and satellites?   | Yes. The government had no intention of increasing military power.                         | Yes. American people were concerned we would not take a leadership role there.                                                                         |

these other agreements made earlier.

3. Why did the Americans agree to this?

4. What would the government be worried about?

5. How would it be possible for the U.S. to lead and dominate?
