Literate Lives Amy Seely Flint, 2007-11-09 *Literate Lives*

Teaching Reading and Writing in Elementary Classrooms invites readers to consider the complexities of the reading process in diverse settings. The text is designed to meet the challenges and needs of undergraduate and graduate teacher candidates in elementary education programs helping them to have a better first year in the classroom experience. The text introduces teacher candidates to the notion that reading is a complex multi-layered process that begins early in a child's life. Reading by all accounts is more than decoding symbols on a page. While this is one component of the reading process, it is important for teacher candidates to see a broader, more complete picture of reading. Given the role that reading plays in the elementary school curriculum, it is imperative that teachers have a well-developed understanding of the reading process and what it means to be a teacher of readers. *Literate Lives: Teaching Reading and Writing in the Elementary Classroom* covers the major theories and application strategies of the reading process as well as current debates in the field using a unique framework that builds upon the following themes: believing that literacy is based in social, cultural, and historical contexts; assuming an inquiry stance; being problem posers and wondering why; using *kidwatching* Goodman 1985 as an assessment tool to make informed instructional decisions; recognizing and using the multiple literacies that children bring to the classroom; lingering and reflecting on one's decisions in light of what one knows and believes. *Cultivating Dynamic Educators* Sarah

Pouezevara, 2018-09-28 *Cultivating Dynamic Educators: Case Studies in Teacher Behavior Change in Africa and Asia* responds to growing recognition by international education professionals, policy makers, and funding partners of the need for qualified teachers and interest in the subject of teacher professional development, also referred to as teacher behavior change. The book responds to important questions that are fundamental to improving teaching quality by influencing teaching practice. These questions include: How do we provide high quality training at scale? How do we ensure that training transfers to change in practice? What methods are most cost effective? How do we know what works? The book includes case studies describing different approaches to teacher behavior change and illustrates how specific implementation choices were made for each context. Individual chapters document lessons learned as well as methodologies used for discerning lessons. The key conclusion is that no single effort is enough on its own; teacher behavior change requires a system-wide view and concerted, coordinated inputs from a range of stakeholders. *Differentiated Literacy Instruction* Sharon Wapole, Michael C.

McKenna, Zoi A., Philippakos, John Z., Strong, 2017-07-05 The goal of this book is to answer the question: What is differentiated instruction? It offers pre-service and in-service teachers the background and foundational skills they will need to understand, plan for, and achieve effective differentiated literacy instruction in their classrooms based on individual student needs. Chapters provide essential information about how to analyze and synthesize data from assessments, use the information for grouping students, and then plan and implement differentiated instruction. Many specific hands-on descriptions and exhibits

are provided Case studies of real classrooms demonstrate effective differentiated instructional techniques End of chapter Practical Application questions allow readers to apply chapter concepts as they learn to motivate and teach diverse learners
