You will use some of the information collected to create a class project.

1. According to Jared Diamond, what is the one factor that allowed Europeans to develop the forces necessary to conquer vast portions of the world?

**Answer:** Geography-having the most productive crops and animals allowed Europeans to develop guns, germs, and steel, and ultimately, to conquer the world.

2. Why were the Europeans who settled the South African cape so successful? Describe two reasons.

**Answer:** The temperature and the climate in the South African cape is nearly the same as what the Europeans had at home. Because the Cape and Europe have a similar latitude (distance from the equator), they can grow the same types of crops and raise the same types of livestock in Africa as they did back home in Europe.

3. How did disease allow the Europeans to conquer the native populations in the Americas and in the African cape?

**Answer:** Europeans introduced germs that these populations had never before been exposed to, particularly smallpox. Because Europeans had been exposed to the disease over the course of centuries, their bodies had built up a natural resistance (antibodies) to these diseases. When the people of the Americas and the South African cape came into contact with these germs, they were killed in massive numbers, making settlement of these lands much easier for the Europeans.

4. While the Europeans who were attempting to overtake/settle the tropical areas of the African continent were responsible for introducing killer germs to the native populations, they also suffered from the effects of the germs native to this part of the world. Describe how these germs worked against the European settlers.

**Answer:** The Europeans were experiencing a reversal of the pattern they were used to. Rather than introducing germs to the people they hoped to conquer, they were being infected by the germs that were indigenous to Africa and losing their livestock and their own lives as a result.

The Obesity Myth Paul Campos, 2004-05-03 Is your weight hazardous to your health According to public health authorities 65 percent of us are overweight Every day we are bombarded with dire warnings about America's obesity epidemic Close to half of the adult population is dieting obsessed with achieving an arbitrary ideal weight Yet studies show that a moderately active larger person is likely to be far healthier and to live longer than someone who is thin but sedentary And contrary to what the fifty billion dollar per year weight loss industry would have us believe medical science has not yet come up with a way to make people thin After years spent scrutinizing medical studies and interviewing leading doctors scientists eating disorder specialists and psychiatrists Professor Paul Campos is here to lead the backlash against weight hysteria and to show that we can safeguard our health without obsessing about the numbers on the scale But The Obesity Myth is not just a compelling argument grounded in the latest scientific research it's also a provocative wry exposé of the culture that feeds on our self-defeating war on fat Campos will show How the nation's most prestigious and trusted media sources consistently misinform the public about obesity What the movie industry's love affair with the fat suit tells us about the relationship between racial and body-based prejudice in America How the skinny elite with their supersized lifestyles and gas-guzzling SUVs project their anxieties about overconsumption on the poorer and heavier underclass How weight loss mania fueled the impeachment of Bill Clinton In this paradigm-busting read Professor Campos challenges the conventional wisdom regarding the medical political and cultural meaning of weight and brings a rational and compelling new voice to America's increasingly irrational weight debate

**Hernando de Soto and Property in a Market Economy** D. Benjamin Barros, 2016-04-22 Hernando de Soto is one of the world's leading public intellectuals His books The Mystery of Capital and The Other Path have had a tremendous impact on debates about international development but his work also has been controversial One of de Soto's core ideas is that the institution of private property is necessary for the proper functioning of a market economy yet even though many property scholars closely follow de Soto's work his ideas have been neglected in property law scholarship and mature market economies like the United States This new collection seeks to remedy this

neglect bringing together a diverse group of scholars to apply de Soto's work to a wide range of contemporary issues in property law and theory. The important contribution it makes to debates and controversies in property law as well as in related economic fields will appeal to scholars of both law and economics. *Order and Disorder* David Rich, 2001-02-28

After critiquing chaos catastrophe and complexity theories showing their limitations in the contemporary era, Rich further develops the development of crisis theory and applies the crisis theory approach to biological and social evolution. Treating evolution in the context of crisis theory, he shows that as evolution is both genetic and social, social evolution is an extension of biological evolution. As physical evolution results from problem solving, social evolution develops from the solving of historically significant problems, bringing about, for instance, the post World War II era of knowledge. In this context, Rich discusses the problems of our era with an emphasis on the paradox of industrialization and its consequences for wealthy and poor nations alike. The paradox of industrialization is approached in terms of crisis theory and resolved. **Borderline Exegesis** Leif E. Vaage, 2015-06-10

In *Borderline Exegesis*, Leif Vaage presents an alternative approach to biblical interpretation or exegesis, an approach that bends the boundaries of the traditional North American methodology to analyze the meaning of biblical texts for a wider audience. To accomplish this, Vaage engages in a practice he calls borderline exegesis. Adapting anthropological notions of borderlands, borderline exegesis writes biblical scholarship peripherally, unearthing the Bible's textual and discursive borderlands and allowing biblical texts to be at play with the utopian imagination. The book's main chapters comprise four case studies that engage in a divergent reading of the book of Job, the Gospel of Matthew, the Epistle of James, and the book of Revelation. Informed by the author's time in war-torn Peru, these chapters take on themes that the poor and disenfranchised have historically claimed: themes of social justice, the legitimacy or lack thereof of prevailing social practices, and most importantly, utopian demand for another possible world. The chapters are held together by the presentation of a greater theoretical framework that provides reflection on the exegetical practices within and confronts biblical scholars with important questions about the aims of the work they do. Taken as a whole, *Borderline Exegesis* seeks to disclose what the professional practice of textual interpretation might become if we refuse the conventional distances between academic practice and lived experience. *Edible Forest Gardens, Volume I* Dave Jacke, Eric Toensmeier, 2005-07-29

*Edible Forest Gardens* is a groundbreaking two-volume work that spells out and explores the key concepts of forest ecology and applies them to the needs of natural gardeners in temperate climates. Volume I lays out the vision of the forest garden and explains the basic ecological principles that make it work. *Edible Forest Gardens* offer an advanced course in ecological gardening, one that will forever change the way you look at plants and your environment.

Globalization Development and Social Justice Ann El Khoury, 2015-03-27

Are there existing alternatives to corporate globalization? What are the prospects for and commonalities between communities and movements such as Occupy the World, Social Forum, and alternative economies? *Globalization Development and Social Justice* advances the proposition that another

globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies **Uruguay** Peter V.N.
