Hacking Your Education:

Hacking Your Education Dale J. Stephens, 2013-03-05 It's no secret that college doesn't prepare students for the real world. Student loan debt recently eclipsed credit card debt for the first time in history and now tops one trillion dollars. And the throngs of unemployed graduates chasing the same jobs makes us wonder whether there's a better way to make it in today's marketplace. There is, and Dale Stephens is proof of that. In *Hacking Your Education*, Stephens speaks to a new culture of hackademics who think college diplomas are antiquated. Stephens shows how he and dozens of others have hacked their education and how you can too. You don't need to be a genius or especially motivated to succeed outside school. The real requirements are much simpler: curiosity, confidence, and grit. *Hacking Your Education* offers valuable advice to current students as well as those who decided to skip college. Stephens teaches you to create opportunities for yourself and design your curriculum inside or outside the classroom. Whether your dream is to travel the world, build a startup, or climb the corporate ladder, Stephens proves you can do it now rather than waiting for life to start after graduation day.

Hack Your Education Jonathan Fritzler, 2015 *Hack Your Education* is the ultimate tool for any student who aspires to make their passion their profession and doesn't want to wait until they graduate to get started cultivating their dreams. Jonathan Fritzler spent years going through the motions of going to school with the goal to graduate so he could begin his real life. Finally, an epiphany hit him like a truck: literally. On his way to school, he was struck by a truck on his moped and was nearly killed. During his recovery, he began to reevaluate his purpose in life and ultimately the purpose of his education. He began focusing his school projects toward developing a business plan for an organization called the Aloha Movement Project, which led him to getting funding to build a million-dollar recording studio in Hawaii. These projects led him to a deep awareness of how powerful Education Energy really is. Now students and community leaders can experience the Education Energy revolution in their own lives. With Education Energy, homework becomes building blocks, teachers become mentors, and the school campus becomes an incubator for students' passions to become real-world initiatives. Do not waste any more school projects. Harness your Education Energy as a Renewable Resource. Special thanks to contributing authors Shante Stuart and Jaimy Baek and all the AMPtivists who contributed so much research and support to our non-profit.

The Thought Leader Formula Robin FarmanFarmaian, 2019-02-28 Everything Stems From Your Thoughts. PEOPLE DON'T PAY FOR CONTENT, THEY PAY FOR PACKAGING. But how do you package yourself in a way that is accessible, relatable, and that will be heard above the noise? You want to expand your career and take your business to the next level. You're not sure exactly where to start, but you want to be known. You might have brilliant ideas, but you weren't born knowing how to sell them. No one is; it takes study, practice, and years of grind. The truth is, there's no difference between branding a company and branding a person. It takes a shift in mindset: you are the company. Robin FarmanFarmaian takes you from zero to blastoff. Take a deep dive through the how of thought leadership; learn the foundations that will create an impact. McGoun,2015-06-05 The pace of technological change has made the immediate and long term future difficult if not impossible to predict Teachers are forced to imagine the world they are preparing their students to live in In this situation creativity becomes a vital resource for enabling uncertain futures to be embraced and an important attribute for students to have both for their learning and their employability in the future In this book the authors argue that creativity is a social and collaborative process that can be enhanced through online and digital technologies Filled with case studies and practical tasks it shows teachers how they can develop an approach to teaching and learning with digital technologies that is inherently social collaborative and creative Including case studies and practical examples of projects and lessons throughout the chapters cover Learning in a networked society An examination of sharing practices and how knowledge can be shared more effectively Potential pitfalls of virtual learning environments and public social networking sites Using digital media to plan schemes of work and lessons How to facilitate meaningful collaboration and discussion through digital media Creating online environments to enable students to share their understandings and learning Bringing together key ideas about creativity collaborative learning and ICT in the classroom this timely book will be an invaluable resource for all teachers

Alternative Universities David J. Staley,2019-03-26 Imagining the universities of the future How can we re envision the university Too many examples of what passes for educational innovation today MOOCs especially focus on transactions on questions of delivery In Alternative Universities David J Staley argues that modern universities suffer from a poverty of imagination about how to reinvent themselves Anyone seeking innovation in higher education today should concentrate

instead he says on the kind of transformational experience universities enact In this exercise in speculative design Staley proposes ten models of innovation in higher education that expand our ideas of the structure and scope of the university suggesting possibilities for what its future might look like What if the university were designed around a curriculum of seven broad cognitive skills or as a series of global gap year experiences What if as a condition of matriculation students had to major in three disparate subjects What if the university placed the pursuit of play well above the acquisition and production of knowledge By asking bold What if questions Staley assumes that the university is always in a state of becoming and that there is not one idea of the university to which all institutions must aspire This book specifically addresses those engaged in university strategy university presidents faculty policy experts legislators foundations and entrepreneurs those involved in what Simon Marginson calls university making Pairing a critique tempered to our current moment with an explanation of how change and disruption might contribute to a new golden age for higher education *Alternative Universities* is an audacious and essential read

Disrupting the Digital Humanities Dorothy Kim, Jesse Stommel, 2018 All too often defining a discipline becomes more an exercise of exclusion than inclusion *Disrupting the Digital Humanities* seeks to rethink how we map disciplinary terrain by directly confronting the gatekeeping impulse of many other so called field defining collections What is most beautiful about the work of the Digital Humanities is exactly the fact that it can't be tidily anthologized In fact the desire to neatly define the Digital Humanities to filter the DH y from the DH is a way of excluding the radically diverse work that actually constitutes the field This collection then works to push and prod at the edges of the Digital Humanities to open the Digital Humanities rather than close it down Ultimately it's exactly the fringes the outliers that make the Digital Humanities both lovely and rigorous This collection does not constitute yet another reservoir for the new Digital Humanities canon Rather our aim is less about assembling content as it is about creating new conversations Building a truly communal space for the digital humanities requires that we all approach that space with a commitment to 1 creating open and non hierarchical dialogues 2 championing non traditional work that might not otherwise be recognized through conventional scholarly channels 3 amplifying marginalized voices 4 advocating for students and learners and 5 sharing generously to support the work of our peers
