Hidden Heroes Americas Military Caregivers:

Hidden Heroes Rajeev Ramchand, Terri Tanielian, Michael P. Fisher, Christine Anne Vaughan, Thomas E. Trail, Caroline Epley, Phoenix Voorhies, Michael William Robbins, Eric Robinson, Bonnie Ghosh-Dastidar, 2014-04-01 Little has been reported about military caregivers the population of those who care for wounded ill and injured military personnel and veterans This report summarizes the results of a study designed to describe the magnitude of military caregiving in the United States today as well as to identify gaps in the array of programs policies and initiatives designed to support military caregivers

America's Military and Veteran Caregivers Rajeev Ramchand, Sarah Dalton, Tamara Dubowitz, Kelly Hyde, Nipher Malika, Andrew R. Morral, Elie Ohana, Vanessa Parks, Terry L. Schell, Gretchen Swabe, Thomas E. Trail, Kayla M. Williams, 2024-12-05 The authors estimated the number of adults caregiving in the United States today investigated how those caring for wounded ill and injured service members and veterans compare with those caring for civilians and with non caregivers and share insights on the potential consequences of caregiving on caregivers health their economic security and their families well being They also propose recommendations to strengthen caregiver support **Hidden Heroes** Rajeev Ramchand, Terri Tanielian, Michael P. Fisher, Christine Anne Vaughan, Caroline Epley, Thomas Trail, Phoenix Voorhies, Michael William Robbins, Eric Robinson, Bonnie Ghosh-Dastidar, 2014-04 While much has been written about the role of caregiving for the elderly and chronically ill and for children with special needs little is known about military caregivers the population of those who care for wounded ill and injured military personnel and veterans These caregivers play an essential role in caring for injured or wounded service members and veterans This enables those for whom they are caring to live better quality lives and can result in faster and improved rehabilitation and recovery Yet playing this role can impose a substantial physical emotional and financial toll on caregivers This report summarizes the results of a study designed to describe the magnitude of military caregiving in the United States today as well as to identify gaps in the array of programs policies and initiatives designed to support military caregivers Improving military caregivers well being and ensuring their continued ability to provide care will require multifaceted approaches to reducing the current burdens caregiving may impose and bolstering their ability to serve as caregivers more effectively Given the systematic differences among military caregiver groups it is also important that tailored approaches meet the unique needs and characteristics of post 9 11 caregivers Abstract

Improving Support for America's Hidden Heroes Terri L. Tanielian, 2017 In this brief RAND researchers document the construction and elements of a research blueprint to inform future efforts to improve support for military and veteran caregivers **American Military Life in the 21st Century** Eugenia L. Weiss, Carl Andrew Castro, 2018-11-16 A comprehensive guide to the lives and experiences of military service members veterans and their families in the United States today with special emphasis given to those of the post 9 11 era This reference work provides detailed information on the issues U S service members face both stateside and during deployments overseas Issues covered include relations with

family substance use housing educational and job training opportunities post traumatic stress disorder and other health issues and experiences of women sexual minorities and ethnic racial minorities in the armed services This set also examines major issues related to military service for people close to the men and women who serve our country such as spouses or partners children and parents grappling with such issues as single parenthood during deployment and bereavement at the loss of a loved one Finally this set is a valuable resource for people seeking a greater understanding of the issues that confront some military service members and veterans from chronic health problems to economic vulnerability to suicide to incarceration The two volumes are written in a comprehensive yet succinct and accessible style by experts familiar with the latest trends and findings

Caring for Veterans and Their Families: A Guide for Nurses and Healthcare Professionals Rita F D'Aoust, Alicia Gill Rossiter, 2021-11-08 Of the approximately 20 million veterans of the U S armed forces less than half utilize the Veteran s Health Administration health care system That means the majority of veterans are receiving care from nurses and healthcare professionals who may not be trained in treating or caring for patients who have served in the military This unique book guides nurses and healthcare professionals through the specific set of needs veterans can present including but not limited to PTSD Topics covered include defining military culture and how to apply that knowledge to provide informed treatment transitioning from service to civilian life and the many challenges expected during re adjustment and re entry recognizing and treating substance use disorders identifying suicidal behaviors and warning signs long term care for elderly veterans and many more topics unique to the healthcare of veterans

The National Brain-Wounded Veteran Brain Drain Eric W. Koleda, 2021-10-01 Traumatic Brain Injuries TBI the invisible wounds and the signature injuries to US service members number over eight hundred thousand The costs of those injuries over time have not been adequately tallied The DoD VA and medicine in general use an inadequate protocol that treats symptoms and fails to treat underlying brain wounds It is fair to say that costs continue to escalate partly as a result of politics brought about by medicine s unwillingness to accept worldwide science and evidence of new non standard treatments that are healing brain wounds Annually millions of people in the US sustain TBIs and Concussions Over a quarter of million are hospitalized and survive According to CDC estimates 1.6 to 3.8 million sports and recreation related concussions occur each year in the U S Over 80 000 experience the onset of long term disability Acquired brain trauma is the second most prevalent disability in the U S now estimated at 13.5 million Americans A war lasting twenty years has coincided with interrelated epidemics of suicide opioid overdoses and mental health deterioration in the military services 118.1 billion per year is the current annual economic impact on our country by TBI veterans who live with untreated undiagnosed or misdiagnosed brain wounds The costs are spread across a complex of known impacts It includes Veteran homelessness loss of state and federal income taxes sales taxes vehicle taxes drug and opioid induced costs non taxable VA and Social Security disability payments state incarceration and hospitalization costs pharmaceuticals and caregiver costs The costs of the moral mental social and behavioral damage are hard to quantify

The financial modeling approach used in this study reflects the estimated economic impact to each state and our country's annual tax revenues and expenses. A similar analysis is done to assess the costs of treating and healing brain wounds with Hyperbaric Oxygen Therapy (HBOT) and other proven alternative functional medicine interventions. This contrasts with the current standard of care, merely treating symptoms and palliating pain and suffering with drugs. Treating and healing brain wounds now possible can reverse the suicide epidemic among service members and brake accelerating costs, improve Quality of Life for the wounded and their families, and affect military readiness and national security. The cost savings are profound. Treating the estimated 877,000 brain wounded post 9/11 Veterans with Hyperbaric Oxygen (HBOT) and other proven alternative therapies will cost an estimated 19.7 Billion. That is less than one percent of the 4.7 Trillion 40 year lifetime costs attributable to NOT treating those brain wounds. Recommendations include Immediate use of proven alternative therapies such as HBOT to arrest the suicide epidemic and heal wounded brains, implementation of a comprehensive plan to promote a collaborative prospective TBI treatment agenda with the sense of urgency that epidemics demand, URGENT DoD and VA efforts to develop coordinate and implement a measurement based TBI management system that documents patients progress over the course of treatment and long term follow up, highest priority assigned to ensure DoD and VA medical personnel are fulfilling their medical ethical obligations of Informed Consent about current alternative treatments, science and the need for immediate identification and treatment of a brain wounded service members, independent audits of all mental health statistics and numbers coming out of DoD and the VA along with budget numbers masking total costs for TBI Veterans, and application of the principles of Functional Medicine in assessing and treating all combat veterans. Military Veteran Employment Nathan D. Ainspan, Kristin N. Saboe, 2021-05-25 Drawing on the principles and research from industrial organizational I/O psychology and best practices from human resources/HR management, this book will help civilian employers improve the way that they locate, hire, and retain military veterans and military spouses. **Mothers, Military and Society** Cole Hampson, 2018-02-01 Motherhood and military are often viewed as dichotomous concepts, with the former symbolizing feminine ideals and expectations and the latter suggesting masculine ideals and norms. Mothers, Military and Society contributes to a growing body of research that disrupts this false dichotomy. This interdisciplinary and international volume explores the many ways in which mothers and the military converse, align, contest, and intersect in society. Through various chapters that include in-depth case studies, theoretical perspectives, and personal narratives, this book offers insights into the complex relationship between motherhood and the military in ways that will engage both academic and non-academic readers alike. **Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2017** United States.
