How to Hide in Plain Sight Emma Noyes, 2024-09-10 The unbreakable bonds of family and love are explored in this brilliant and tender story from the author of *Guy's Girl* On the day she arrives in Canada for her older brother's wedding Eliot Beck hasn't seen her family in three years Eliot adores her big wacky dysfunctional collection of siblings and in laws but there's a reason she fled to Manhattan and buried herself in her work and she's not ready to share it with anyone Not when speaking it aloud could send her back into the never ending cycle of the obsessive compulsive disorder that consumed her for years Eliot thinks she's prepared to survive the four day long wedding extravaganza until she sees her best friend Manuel waiting for her at the marina and looking as handsome as ever He was the person who when they met as children felt like finding the missing half of her soul The person she tried so hard not to fall in love with but did anyway Manuel's presence at the wedding threatens to undo the walls Eliot has built around herself The fortress that keeps her okay If she isn't careful by the end of this wedding the whole castle might come crumbling down Financial Cryptography Rafael

*Security* Bart De Decker, Ingrid Schaumüller-Bichl, 2010-05-29 Over the last decade we have witnessed a growing dependency on information technology resulting in a wide range of new opportunities. Clearly it has become almost impossible to imagine life without a personal computer or laptop or without a cell phone. Social network sites (SNS) are competing with face-to-face encounters and may even oust them. Most SNS adepts have hundreds of friends happily sharing pictures and profiles and endless chitchat. We are on the threshold of the Internet of Things where every object will have its RFID tag. This will not only affect companies who will be able to optimize their production and delivery processes but also end users who will be able to enjoy many new applications ranging from smart shopping and smart fridges to geo-localized services. In the near future elderly people will be able to stay longer at home due to clever health monitoring systems. The sky seems to be the limit. However we have also seen the other side of the coin: viruses, Trojan horses, breaches of privacy, identity theft and other security threats. Our real and virtual worlds are becoming increasingly vulnerable to attack. In order to encourage security research by both academia and industry and to stimulate the dissemination of results, conferences need to be organized. With the 11th edition of the joint IFIP TC 6/TC 11 Conference on Communications and Multimedia Security (CMS 2010) the organizers resumed the tradition of previous CMS conferences after a three-year recess.
