High Risk Iv Medications In Special Patient Populations:

High-Risk IV Medications in Special Patient Populations Sandra Kane-Gill, Joseph Dasta, 2011-06-27 Critical Care Clinicians can use general drug references Micromedex Lexicomp for data on dosing of high alert medications in special patient populations but these references are not available to all healthcare clinicians they are expensive and they are not specific to high alert medications or critically ill patients Doctors nurses and pharmacists in the hospital setting will benefit from having one resource with all of this information The purpose of this reference manual would be to guide critical care clinicians on dosing of high alert medications in special patient populations The most important feature of the book will be a summary of primary literature using tables when possible This will be useful to readers because currently a reference book does not exist that guides clinicians in these difficult dosing decisions **Oxford Textbook of Anaesthesia for the Obese Patient** Ashish C. Sinha, 2021-05-07 Obesity is a global public health issue significant numbers of the world's population are overweight growing numbers are obese and many are morbidly obese As obesity is associated with a range of co morbidities namely cardiovascular disease diabetes cancer depression and sleep apnoea it presents a daunting peri operative challenge to the anaesthetist The increasing size and weight of patients presenting for surgery involves multiple issues from starting intravenous lines through to intubation and ventilation challenges The Oxford Textbook of Anaesthesia for the Obese Patient is a highly authoritative evidence based account of the principles and clinical practice within the field Across 36 chapters this resource provides comprehensive coverage of all aspects of the subject including physiological and pharmacological modifications in the obese patient bariatric and non bariatric surgery specific clinical issues such as fluid management and tissue oxygenation as well as challenges arising from obesity in the setting of paediatrics obstetrics intensive care and trauma Written and edited by experts in the field this resource is the definitive guide to clinical management of the obese patient exploring various international approaches to practice with helpful case studies and practical advice on common intra operative challenges and how to resolve them using evidence and best practice **Oxford Textbook of Palliative Nursing** Betty Rolling Ferrell, Judith A. Paice, 2019-02-15 The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available Dr Betty Rolling Ferrell and Dr Judith A Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical psychological social and spiritual needs pertinent to the successful palliative care team Organized within 7 Sections this new edition covers the gamut of principles of care from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond This fifth edition features several new chapters including chapters on advance care planning organ donation self care global palliative care and the ethos of palliative nursing Each chapter is rich with tables and figures case examples for improved learning and a strong evidence based practice to support the highest quality of care The book offers a valuable and practical resource for students and clinicians across all settings of care The content is relevant for specialty hospice agencies and palliative care programs as

well as generalist knowledge for schools of nursing oncology critical care and pediatric Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill this new edition will continue to serve as the cornerstone of palliative care education **Clinical**
