High Risk Maternity Care Moore:

Models of Care in Maternity Services Tahir Mahmood, Philip Owen, Sabaratnam Arulkumaran, Charnjit Dhillon, 2010-11-01 This book helps all those working in maternity services to improve the quality of the care they offer. Improvement is driven by clinical effectiveness and increasing patient demands and for each area of practice described this book outlines the service organisation needed to achieve this improvement. The goal is to help clinicians take responsibility for developing services that meet the needs of their patients as well as managing their individual medical conditions. The book demonstrates that much can be achieved within current resources and without major additional expense. Different approaches are demonstrated but the key issue is the patient pathway. Trainees, clinicians, managers and commissioners of services will find this book of practical value. There should be a copy on the shelves of every hospital obstetric unit.

Anesthetic and Obstetric Management of High-Risk Pregnancy Sanjay Datta, 2006-04-29 It has been enormously satisfying to prepare the third edition of *Anesthetic and Obstetric Management of High Risk Pregnancy* because it fulfills the need for close communication between two specialties: anesthesiology and obstetrics. This relationship is necessary not only to take care of the sick parturient but also to deliver a healthy baby. New developments in obstetrics and in obstetric anesthesia necessitated this third edition. Most of the contributors to this edition are new and they have provided information on the latest approaches as well as updated information. In addition, Chapter 13, Critical Care Anesthesia for High Risk Parturients, is completely new. Like earlier editions, the third edition includes contributions from an international team of experts in the field of obstetric anesthesia and obstetrics. I thank all the authors for their valuable contributions. The authors have expressed their own opinions and recommendations which do not necessarily reflect my own views. I also wish to thank Ms Elizabeth Kiernan for her endless help in completing the new edition. I sincerely hope this edition will further reinforce the concept of the team approach for taking care of the high risk parturient. **Advanced Critical Care Nursing - E-Book**
