## **High Tech Trash Digital Devices Hidden Toxics And Human Health:**

**High Tech Trash** Elizabeth Grossman, 2006-05-06 The Digital Age was expected to usher in an era of clean production an alternative to smokestack industries and their pollutants But as environmental journalist Elizabeth Grossman reveals in this penetrating analysis of high tech manufacture and disposal digital may be sleek but it s anything but clean Deep within every electronic device lie toxic materials that make up the bits and bytes a complex thicket of lead mercury cadmium plastics and a host of other often harmful ingredients High Tech Trash is a wake up call to the importance of the e waste issue and the health hazards involved Americans alone own more than two billion pieces of high tech electronics and discard five to seven million tons each year As a result electronic waste already makes up more than two thirds of the heavy metals and 40 percent of the lead found in our landfills But the problem goes far beyond American shores most tragically to the cities in China and India where shiploads of discarded electronics arrive daily There they are recycled picked apart by hand exposing thousands of workers and community residents to toxics As Grossman notes This is a story in which we all play a part whether we know it or not If you sit at a desk in an office talk to friends on your cell phone watch television listen to music on headphones are a child in Guangdong or a native of the Arctic you are part of this story The answers lie in changing how we design manufacture and dispose of high tech electronics Europe has led the way in regulating materials used in electronic devices and in e waste recycling But in the United States many have yet to recognize the persistent human health and environmental effects of the toxics in high tech devices If Silent Spring brought national attention to the dangers of DDT and other pesticides High Tech Trash could do the same for a new generation of technology s products

**Histories of the Dustheap** Stephanie Foote, Elizabeth Mazzolini, 2012-10-05 An examination of how garbage reveals the relationships between the global and the local the economic and the ecological and the historical and the contemporary Garbage considered both materially and culturally elicits mixed responses Our responsibility toward the objects we love and then discard is entangled with our responsibility toward the systems that make those objects Histories of the Dustheap uses garbage waste and refuse to investigate the relationships between various systems the local and the global the economic and the ecological the historical and the contemporary and shows how this most democratic reality produces identities social relations and policies The contributors first consider garbage in subjective terms examining toxic autobiography by residents of Love Canal the intersection of public health and women s rights and enviroblogging They explore the importance of place with studies of post Katrina soil contamination in New Orleans e waste disposal in Bloomington Indiana and garbage on Mount Everest And finally they look at cultural contradictions as objects hover between waste and desirability examining Milwaukee s efforts to sell its sludge as fertilizer the plastics industry s attempt to wrap plastic bottles and bags in the mantle of freedom of choice and the idea of obsolescence in the animated film The Brave Little Toaster Histories of the Dustheap offers a range of perspectives on a variety of incarnations of garbage inviting the reader to consider garbage in a

way that goes beyond the common buy green discourse that empowers individuals while limiting environmental activism to consumerist practices

*Carceral Spaces* Nick Gill, 2016-04-15 This book draws together the work of a new community of scholars with a growing interest in carceral geography the geographical study of practices of imprisonment and detention It combines work by geographers on mainstream penal establishments where people are incarcerated by the prevailing legal system with geographers recent work on migrant detention centres where irregular migrants and refused asylum seekers are detained ostensibly pending decisions on admittance or repatriation Working in these contexts the book s contributors investigate the geographical location and spatialities of institutions the nature of spaces of incarceration and detention and experiences inside them governmentality and prisoner agency cultural geographies of penal spaces and mobility in the carceral context In dialogue with emergent and topical agendas in geography around mobility space and agency and in relation to international policy challenges such as the dis functionality of imprisonment and the search for alternatives to detention this book presents a timely addition to emergent interdisciplinary scholarship that will prompt dialogue among those working in geography criminology and prison sociology

**The Routledge Companion to Labor and Media** Richard Maxwell, 2015-07-16 Labor resides at the center of all media and communication production from the workers who create the information technologies that form the dynamic core of the global capitalist system and the designers who create media content to the salvage workers who dismantle the industry s high tech trash The Routledge Companion to Labor and Media is the first book to bring together representative research from the diverse body of scholarly work surrounding this often fragmentary field and seeks to provide a comprehensive resource for the study and teaching of media and labor Essays examine work on the mostly unglamorous side of media and cultural production technology manufacture and every occupation in between Specifically this book features wide ranging international case studies spanning the major global hubs of media labor interdisciplinary approaches for thinking about and analyzing class and labor in information communication technology ICT consumer electronics CE and media cultural production an overview of global political economic conditions affecting media workers reports on chemical environments and their effect on the health of media workers and consumers activist scholarship on media and labor and inspiring stories of resistance and solidarity

**Recycling** Viki Wagner, 2009-03-06 The collection of essays that editor Viki Wagner has compiled for your readers will get them thinking critically about our world and the things we need to be doing in relation to recycling The Economist essay defines the benefits of recycling insisting the benefits outweigh the costs Another essay reports the exact opposite By reading divergent viewpoints readers will be able to form intelligent opinions about recycling

*Cheaponomics* Michael Carolan, 2014-03-21 Do you really think you are getting a good deal when given that free mobile phone for switching service providers if a multinational retailer undercuts its competitors or by the fact that food is relatively cheaper today in many countries than ever before Think again As Michael Carolan clearly shows in this compelling book cheapness is an illusion The real cost of

low prices is alarmingly high It is shown for example that citizens are frequently subsidising low prices through welfare support to poorly paid workers in their own country or relying on the exploitation of workers in poor countries for cheap goods Environmental pollution may not be costed into goods and services but is paid for indirectly by people living away from its source or by future generations Even with private cars when the total costs of this form of mobility are tallied it proves to be an astronomically expensive model of transportation All of these costs need to be accounted for The author captures these issues by the concept of cheaponomics The key point is that costs and risks are socialised we all pay for cheapness but not at the point of purchase Drawing on a wide range of examples and issues from over consumption and waste to over work unemployment inequality and the depersonalising of communities it is convincingly shown that cheapness can no longer be seen as such a bargain Instead we need to refocus for a better sense of well being social justice and a balanced approach to prosperity

**Finite Media** Sean Cubitt, 2016-12-08 While digital media give us the ability to communicate with and know the world their use comes at the expense of an immense ecological footprint and environmental degradation In *Finite Media* Sean Cubitt offers a large scale rethinking of theories of mediation by examining the environmental and human toll exacted by mining and the manufacture use and disposal of millions of phones computers and other devices The way out is through an eco political media aesthetics in which people use media to shift their relationship to the environment and where public goods and spaces are available to all Cubitt demonstrates this through case studies ranging from the 1906 film *The Story of the Kelly Gang* to an image of Saturn taken during NASA's Cassini Huygens mission suggesting that affective responses to images may generate a populist environmental politics that demands better ways of living and being Only by reorienting our use of media Cubitt contends can we overcome the failures of political elites and the ravages of capital

**Respawn** Colin Milburn, 2018-12-14 Colin Milburn examines the relationships between video games hackers and science fiction showing how games provide models of social and political engagement critique and resistance while offering a vital space for players and hacktivists to challenge centralized power and experiment with alternative futures

**Gathering Electronic Waste in Tanzania** Samwel Moses Ntapanta, 2024-12-16 Discussions of waste and electronic discard management often view micro scale ingenious activities around unregulated recycling centers in the Global South only as a source of pollution *Gathering Electronic Waste in Tanzania* Labor Value and Toxicity goes further and explores the complexities of electronic waste management Samwel Moses Ntapanta examines the materialities of electronics and e discards toxicity and the sociocultural and economic fabrics of e waste management in Tanzania He traces the lifecycle of electronic goods beyond their discard in the Global South from the importation of used goods to cycles of repair and from the collection of scrap to repurposing materials for manufacturing Through the concept of gathering Ntapanta provides insight into the effects of unregulated mechanisms to address the e waste problem He argues that understanding this connection between informal workers and the economy at large paves a path for better waste regime models reduced violence and environmental justice for workers and

marginalized communities      **Making a Green Machine** Finn Arne Jørgensen, 2011-07-11 Consider an empty bottle or can one of the hundreds of billions of beverage containers that are discarded worldwide every year Empty containers have been at the center of intense political controversies technological innovation processes and the modern environmental movement Making a Green Machine examines the development of the Scandinavian beverage container deposit refund system which has the highest return rates in the world from 1970 to present Finn Arne Jørgensen investigates the challenges the system faced when exported internationally and explores the critical role of technological infrastructures and consumer convenience in modern recycling His comparative framework charts the complex network of business and political actors involved in the development of the reverse vending machine RVM and bottle deposit legislation to better understand the different historical trajectories empty beverage containers have taken across markets including the U S The RVM has served as more than a hole in the wall it began simply as a tool for grocers who had to handle empty refillable glass bottles but has become a green machine to redeem the empty beverage container helping both business and consumers participate in environmental actions

**Virtual Menageries** Jody Berland, 2024-11-26 The close interdependency of animal emissaries and new media from early European colonial encounters with the exotic to today's proliferation of animals in digital networks From cat videos to corporate logos digital screens and spaces are crowded with animal bodies In Virtual Menageries Jody Berland examines the role of animals in the spread of global communications Her richly illustrated study links the contemporary proliferation of animals on social media to the collection of exotic animals in the formative years of transcontinental exploration and expansion By tracing previously unseen parallels across the history of exotic and digital menageries Berland shows how and why animals came to bridge peoples territories and technologies in the expansion of colonial and capitalist cultures Berland's genealogy of the virtual menagerie begins in 1414 when a ruler in Bengal sent a Kenyan giraffe to join a Chinese emperor's menagerie It maps the beaver's role in the colonial conquest of Canada and examines the appearances of animals in early moving pictures The menagerie is reinvented for the digital age when image and sound designers use parts or images of animals to ensure the affective promise and commercial spread of an emergent digital infrastructure These animal images are emissaries that enliven and domesticate the ever expanding field of mediation Virtual Menageries offers a unique account of animals and animal images as mediators that encourage complicated emotional economic and aesthetic investment in changing practices of connection

*Economies of Recycling* Catherine Alexander, Joshua Reno, 2012-08-09 For some recycling is a big business for others a moralised way of engaging with the world But for many this is a dangerous way of earning a living With scrap now being the largest export category from the US to China the sheer scale of this global trade has not yet been clearly identified or analysed Combining fine grained ethnographic analysis with overviews of international material flows Economies of Recycling radically changes the way we understand global and local economies as well as the new social relations and identities created by recycling processes Following global material chains this groundbreaking book

reveals astonishing connections between persons households cities and global regions as objects are reworked taken to pieces and traded With case studies from Africa Latin America South Asia China the former Soviet Union North America and Europe this timely collection debunks common linear understandings of production exchange and consumption and argues for a complete re evaluation of North South economic relationships
