law **Service Life Estimation and Extension of Civil Engineering Structures** Vistasp M. Karbhari, L S Lee, 2010-12-20

Service life estimation is an area of growing importance in civil engineering both for determining the remaining service life of civil engineering structures and for designing new structural systems with well defined periods of functionality. Service life estimation and extension of civil engineering structures provides valuable information on the development and use of newer and more durable materials and methods of construction as well as the development and use of new techniques of estimating service life. Part one discusses using fibre reinforced polymer FRP composites to extend the service life of civil engineering structures. It considers the key issues in the use of FRP composites, examines the possibility of extending the service life of structurally deficient and deteriorating concrete structures and investigates the uncertainties of using FRP composites in the rehabilitation of civil engineering structures. Part two discusses estimating the service life of civil engineering structures including modelling service life and maintenance strategies and probabilistic methods for service life estimation. It goes on to investigate non destructive evaluation and testing NDE NDT as well as databases and knowledge based systems for service life estimation of rehabilitated civil structures and pipelines. With its distinguished editors and international team of contributors, Service life estimation and extension of civil engineering structures is an invaluable resource to academics, civil engineers, construction companies, infrastructure providers and all those with an interest in improving the service life, safety and reliability of civil engineering structures. A single source of information on the service life of reinforced concrete and fibre reinforced polymer FRP rehabilitated structures. Examines degradation mechanisms in composites for rehabilitation considering uncertainties in FRP reliability. Provides an overview of probabilistic methods for rehabilitation and service life estimation of corroded structures.

Manual práctico de utilización del nivel láser (e-book) Ana Isabel Suárez Prieto, 2007-06. Este manual realizado con la colaboración de la Fundación Laboral de la Construcción del Principado de Asturias le muestra las diversas aplicaciones que tiene un nivel láser en distintos oficios relacionados con la construcción. El contenido se ha estructurado en cinco unidades en las que se analizan con dibujos gráficos y fotografías algunos conceptos básicos de las nivelaciones, se describen los diversos tipos de niveles láser disponibles en el mercado y los riesgos y sus correspondientes medidas de seguridad a la hora de utilizarlos. Finalmente el libro describe las distintas aplicaciones prácticas paso a paso para que el usuario del nivel láser pueda sacarle el máximo partido de forma sencilla. Al final del libro se incluyen junto a un práctico glosario de términos y a la bibliografía las soluciones a las pruebas de autoevaluación incluidas en cada unidad. Se trata en definitiva de un excelente libro que le capacitará para clasificar los niveles láser y conocer las aplicaciones de los diversos niveles láser de interior o exterior. *Title List of Documents Made Publicly Available* , 1991

The relationship between music and language Lutz Jäncke, Traditionally music and language have been treated as different psychological faculties. This duality is reflected in older theories about the lateralization of speech and music in that speech functions were thought to be localized on the left and music functions on the right hemisphere. But with the advent of

modern brain imaging techniques and the improvement of neurophysiological measures to investigate brain functions an entirely new view on the neural and psychological underpinnings of music and speech has evolved The main point of convergence in the findings of these new studies is that music and speech functions have many aspects in common and that several neural modules are similarly involved in speech and music There is also emerging evidence that speech functions can benefit from music functions and vice versa This new research field has accumulated a lot of new information and it is therefore timely to bring together the work of those researchers who have been most visible productive and inspiring in this field and to ask them to present their new work or provide a summary of their laboratory s work
