

RESEARCH METHODOLOGIES

Research methodologies can roughly be categorized into three groups: quantitative, qualitative, and mixed-methods.

QUALITATIVE RESEARCH

Qualitative research investigates human experiences and behavior through non-numerical data collection and analysis.

QUANTITATIVE RESEARCH

Quantitative research examines relationships between variables using numerical data and statistical techniques.

MIXED METHODS RESEARCH

Mixed methods research combines qualitative and quantitative approaches to provide a more holistic understanding of a research question.

Its Our Research:

It's Our Research Tomer Sharon, 2012-03-19 It's Our Research provides a strategic framework for people who practice UX research who wish to be heard by their stakeholders. It gives you the techniques needed to involve stakeholders throughout the process of planning, execution, analysis, and reporting. UX research dramatically increases the chances that product managers, engineers, and management agree to do research and act upon its results. Follow Tomer Sharon's techniques and methods detailed inside. Features a series of video interviews with UX practitioners and researchers. Provides dozens of case studies and visuals from international research practitioners. Provides a toolset that will help you justify your work to stakeholders, deal with office politics, and hone your client skills. Presents tried and tested techniques for working to reach positive, useful, and fruitful outcomes. *Autoethnography* Tony E. Adams, Stacy Holman Jones, Carolyn

Ellis, 2014-10-01 Autoethnography is a method of research that involves describing and analyzing personal experiences in order to understand cultural experiences. The method challenges canonical ways of doing research and recognizes how personal experience influences the research process. Autoethnography acknowledges and accommodates subjectivity, emotionality, and the researcher's influence on research. In this book, the authors provide a historical and conceptual overview of autoethnography. They share their stories of coming to autoethnography and identify key concerns and considerations that led to the development of the method. Next, they outline the purposes and practices, the core ideals of autoethnography, how autoethnographers can accomplish these ideals, and why researchers might choose to do autoethnography. They describe the processes of doing autoethnography, conducting fieldwork, discussing ethics in research, and interpreting and analyzing personal experience. They explore the various modes and techniques used and involved in writing autoethnography. They conclude with goals for creating and assessing autoethnography and describe the future of autoethnographic inquiry. Throughout, the authors provide numerous examples of their work and share key resources. This book will serve as both a guide to the practices of doing autoethnography and an exemplar of autoethnographic research processes and representations. **Researching Justice** Agatha Herman, Joshua Inwood, 2024-07-31 Understanding justice for many begins with questions of injustice. This volume pushes us to consider the extent to which our scholarly and everyday practices are or can become socially just. In this edited collection, international contributors reflect on what the practice of justice means to them and discuss how it animates and shapes their research across diverse fields from international relations to food systems, political economy, migration studies, and criminology. Giving insights into real-life research practices for scholars at all levels, this book aids our understanding of how to employ and live justice through our work and daily lives. *Open Door*, 1911
