Burke, 2020-09-08 The first history of the western polymath from the fifteenth century to the present day From Leonardo Da Vinci to John Dee and Comenius from George Eliot to Oliver Sacks and Susan Sontag polymaths have moved the frontiers of knowledge in countless ways But history can be unkind to scholars with such encyclopaedic interests All too often these individuals are remembered for just one part of their valuable achievements In this engaging erudite account renowned cultural historian Peter Burke argues for a more rounded view Identifying 500 western polymaths Burke explores their wide ranging successes and shows how their rise matched a rapid growth of knowledge in the age of the invention of printing the discovery of the New World and the Scientific Revolution It is only more recently that the further acceleration of knowledge has led to increased specialisation and to an environment that is less supportive of wide ranging scholars and scientists Spanning the Renaissance to the present day Burke changes our understanding of this remarkable intellectual species

Does Economic Space Matter? Hiroshi Ohta, 1993-09-15 This is a Festschrift to honour Professor Melvin Greenhut who has long toiled on spatial economics The book accordingly focuses on a single question in what sense economic space matters

in economic theory Space in economics is an elusive concept apparently separating and embracing economic agents at the same time This is why adding it to already overly complicated economic agents at the same time This is why adding it to already overly complicated economic models may not necessarily help economics to become sufficiently realistic In this book leading scholars of international stature try to find ways of introducing space in economic theory which will make it simpler and more realistic analysing theoretical and historical issues of contemporary relevance such as land use congestion and public goods location theory and spatial competition **Who's who in Economics** Mark Blaug, 1986 This edition includes 337 more entries bringing the total to over 1 400 thumbnail sketches of economists who have contributed to the literature over the past three centuries
