Wayne,2010-10-11 A comprehensive examination of American women scientists across the sciences throughout the 20th century providing a rich historical context for understanding their achievements and the way they changed the practice of science Much more than a Who's Who this exhaustive two volume encyclopedia examines the significant achievements of 20th century American women across the sciences in light of the historical and cultural factors that affected their education employment and research opportunities With coverage that includes a number of scientists working today the encyclopedia shows just how much the sciences have evolved as a professional option for women from the dawn of the 20th century to the present American Women of Science since 1900 focuses on 500 of the 20th century's most notable American women scientists many overlooked undervalued or simply not well known In addition it offers individual features on 50 different scientific disciplines Women in Astronomy etc as well as essays on balancing career and family girls and science education and other sociocultural topics Readers will encounter some extraordinary scientific minds at work getting a sense of the obstacles they faced as the scientific community faced the questions of feminism and gender confronting the nation as a whole Figuring Maria Popova,2019-02-05 Figuring explores the complexities of love and the human search for truth and meaning through the interconnected lives of several historical figures across four centuries beginning with the astronomer Johannes Kepler who discovered the laws of planetary motion and ending with the marine biologist and author Rachel Carson who catalyzed the environmental movement Stretching between these figures is a cast of artists writers and scientists mostly women mostly queer whose public contribution have risen out of their unclassifiable and often heartbreaking private relationships to change the way we understand experience and appreciate the universe Among them are the astronomer Maria Mitchell who paved the way for women in science the sculptor Harriet Hosmer who did the same in art the journalist and literary critic Margaret Fuller who sparked the feminist movement and the poet Emily Dickinson Emanating from these lives are larger questions about the measure of a good life and what it means to leave a lasting mark of betterment on an imperfect world Are achievement and acclaim enough for happiness Is genius Is love Weaving through the narrative is a set of peripheral figures Ralph Waldo Emerson Charles Darwin Elizabeth Barrett Browning Herman Melville Frederick Douglass Nathaniel Hawthorne and Walt Whitman and a tapestry of themes spanning music feminism the history of science the rise and decline of religion and how the intersection of astronomy poetry and Transcendentalist philosophy fomented the environmental movement **Spirituality in the Flesh** Robert C. Fuller,2008-09-08 Comfortable with the language of scientific analysis and sympathetic to the inherently subjective aspects of religious events Fuller introduces the biological

study of religion by joining together this era's unprecedented understanding of bodily states with an expert's knowledge of religious phenomena. Culling together insights from scientific observations, historical allusions, and literary references, *Spirituality in the Flesh* offers a bold look at the biological underpinnings of religion and opens up new and exciting agendas for understanding the nature and value of human religiosity.

Sustaining Lake Superior Nancy Langston, 2017-10-24 A compelling exploration of Lake Superior's conservation recovery and what it can teach us in the face of climate change. Lake Superior, the largest lake in the world, has had a remarkable history including resource extraction and industrial exploitation that caused nearly irreversible degradation. But in the past fifty years, it has experienced a remarkable recovery and rebirth. In this important book, leading environmental historian Nancy Langston offers a rich portrait of the lake's environmental and social history, asking what lessons we should take from the conservation recovery as this extraordinary lake faces new environmental threats. In her insightful exploration, Langston reveals hope in ecosystem resilience and the power of community advocacy, noting ways Lake Superior has rebounded from the effects of deforestation and toxic waste wrought by mining and paper manufacturing. Yet despite the lake's resilience, threats persist. Langston cautions readers regarding new mining interests and persistent toxic pollutants that are mobilizing with climate change.

The Fifties James R. Gaines, 2023-02-07 A bold and original argument that upends the myth of the Fifties as a decade of conformity to celebrate the solitary brave and stubborn individuals who pioneered the radical gay rights, feminist, civil rights, and environmental movements from historian James R. Gaines.
