trajectory or story arc In science fiction parabolas take us from the known to the unknown More concrete than themes more complex than motifs parabolas are combinations of meaningful setting character and action that lend themselves to endless redefinition and jazzlike improvisation The fourteen original essays in this collection explore how the field of science fiction has developed as a complex of repetitions influences arguments and broad conversations This particular feature of the genre has been the source of much critical commentary most notably through growing interest in the sf megatext a continually expanding archive of shared images situations plots characters settings and themes found in science fiction across media Contributors include Jane Donawerth Terry Dowling L Timmel Duchamp Rachel Haywood Ferreira Pawel Frelik David M Higgins Amy J Ransom John Rieder Nicholas Ruddick Graham Sleight Gary K Wolfe and Lisa Yaszek **Foundation** ,1979
