Robert McCarter,2019-03 The architecture of WG Clark is inextricably grounded in its place the Atlantic coastal states of the American South Over the course of his 40 year career as a modern architect practicing in historic contexts Clark has constructed a small but significant body of work of unparalleled high quality and experiential richness Clark s remarkably resolved spatial compositions are formally restrained and contextually appropriate and while relatively few in number have nevertheless exerted an outsize influence on architects around the world Clark s regional grounding slow and measured pace of design and modest publicity has provided him with the time in place necessary for thinking and making at the very highest level Like the relatively few works of Louis Kahn and Carlo Scarpa the works of WG Clark have attained canonical status and his redefinition of architectural design as being grounded in the history of the discipline as well as in the particularities of its place has proved to be of ever increasing relevance to contemporary practice **Louis I. Kahn - Exposed concrete and hollow stones**

You Say to Brick Wendy Lesser, 2017-03-14 Born in Estonia 1901 and brought to America in 1906 the architect Louis Kahn grew up in poverty in Philadelphia By the time of his mysterious death in 1974 he was widely recognized as one of the greatest architects of his era Yet this enormous reputation was based on only a handful of masterpieces all built during the last fifteen years of his life Wendy Lesser's *You Say to Brick: The Life of Louis Kahn* is a major exploration of the architect's life and work Kahn perhaps more than any other twentieth century American architect was a public architect Rather than focusing on corporate commissions he devoted himself to designing research facilities government centers museums libraries and other structures that would serve the public good But this warm captivating person beloved by students and admired by colleagues was also a secretive man hiding under a series of masks Kahn himself however is not the only complex subject that comes vividly to life in these pages His signature achievements like the Salk Institute in La Jolla the National Assembly Building of Bangladesh and the Indian Institute of Management in Ahmedabad can at first seem as enigmatic and beguiling as the man who designed them In attempts to describe these structures we are often forced to speak in contradictions and paradoxes structures that seem at once unmistakably modern and ancient enormous built spaces that offer a sense of intimate containment designs in which light itself seems tangible a raw material as tactile as travertine or Kahn's beloved concrete This is where Lesser's talents as one of our most original and gifted cultural critics come into play Interspersed throughout her account of Kahn's life and career are exhilarating in situ descriptions of what it feels like to move through his built structures Drawing on extensive original research lengthy interviews with his children his colleagues and his students and travel to the far flung sites of his career defining buildings Lesser has written a landmark biography of this elusive genius revealing the mind behind some of the twentieth century's most celebrated architecture

World Heritage in Iran Ali Mozaffari,2016-02-11 Pasargadae is the location of the tomb of Cyrus the Great founder of the Achaemenid Empire Through the ages it was Islamised and the tomb was ascribed to the Mother of Solomon It was only at the beginning of the twentieth century that archaeological evidence demonstrated the relationship between the site and Cyrus and it was appropriated into conflicting political discourses on nationalism and Islamism while concurrently acknowledged as a national and then a World Heritages site However Pasargadae is neither an isolated World Heritage site nor purely a symbol of abstract state politics Pasargadae and its immediate vicinity constitute a living landscape occupied by villagers nomads and tourists This edited volume presents for the first time a broad multi disciplinary examination of Pasargadae by experts from both outside and within Iran It specifically focuses on those disciplines that are absent from existing studies such as ethnography tourism and museum studies providing valuable insights into this fascinating place In its totality the book argues that to understand World Heritage sites and their problems fully a holistic approach should be adopted which considers the manifold of perspectives and issues It also puts forward a novel approach to the question of heritage representation and construction of collective identity from the framework of place

Air-Conditioning in Modern American Architecture, 1890-1970 Joseph M. Siry,2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history

Light as Experience and Imagination from Medieval to Modern Times David S. Herrstrom,2022-11-21 In Light as Experience and Imagination from

Medieval to Modern Times David S Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times The true subject of the book is making sense of the individual's relationship with light rather than the investigation of light's essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature Instead of its evolution this book celebrates the complexity of our relation to light's character No individual experience of light being truer than any other **Trajectories in Architecture** Michael Jasper, 2023-04-21

Trajectories in Architecture Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date Trajectories in Architecture adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei *Building Paradise* Harry Francis Mallgrave, 2021-09-29

A sweeping historical study Building Paradise seeks to construct a garden ethic for the design arts It is an ethic predicated on the idea that with our recent ecological and biological insights we can build more intelligently than the status quo of current design practices The paradisiacal instinct is the motivation behind every artistic impulse From its theological origins to the present the idea of paradise the garden as a place of peace beauty and happiness has acquired numerous meanings It was a motif expounded in the earliest cultures of Mesopotamia Egypt and the Indus Valley and it later became a dominant feature of Buddhist Judeo Christian and Islamic practices It informed Greco Roman mythologies and the design of a Japanese garden it was a motivation for the Renaissance humanists and was complicit in visions of a New Arcadia within the landscapes of the Americas This book underscoring how the built and urban environments shapes culture takes a biophilic approach and draws upon the major advances of the human sciences of the last few decades to argue on behalf of a design ethic centered squarely on human needs and aspirations Written for students and academics within architecture and all related fields this book focuses on the efforts to build paradise in a material way
