Gateway to the Moon John F. Kennedy Space Center. Office of Public Affairs, 1965 *A History of the Kennedy Space Center* Kenneth Lipartito, Orville R Butler, 2007-08-12 This first comprehensive history of the Kennedy Space Center NASA's famous launch facility located at Cape Canaveral Florida reveals the vital but largely unknown work that takes place before the rocket is lit Though the famous Vehicle Assembly Building and launch pads dominate the flat Florida landscape at Cape Canaveral and attract 1.5 million people each year to its visitor complex few members of the public are privy to what goes on there beyond the final outcome of the flaring rocket as it lifts into space With unprecedented access to a wide variety of sources including the KSC archives other NASA centers the National Archives and individual and group interviews and collections Lipartito and Butler explore how the methods and technology for preparing testing and launching spacecraft have evolved over the last 45 years Their story includes the Mercury and Gemini missions the Apollo lunar program the Space Shuttle scientific missions and robotic spacecraft and the International Space Station as well as the tragic accidents of Challenger and Columbia Throughout the authors reveal the unique culture of the people who work at KSC and make Kennedy distinct from other parts of NASA As Lipartito and Butler show big NASA projects notably the Space Shuttle and the International Space Station had much to learn on the ground before they made it to space Long before a spacecraft started its ascent crucial work had been done work that combined the muscular and mundane with the high tech and applied the vital skills and knowledge of the men and women of KSC to the design of vehicles and missions The authors challenge notions that successful innovation was simply the result of good design alone and argue that with large technical systems real world experience actually made the difference between bold projects that failed and innovations that stayed within budget and produced consistent results The authors pay particular attention to operational knowledge developed by KSC the insights that came from using and operating complex technology This work makes it abundantly clear that the processes performed by ground operations are absolutely vital to success **The Kennedy Space Center Story** NASA Public Affairs, 1991-12

Space Race 2.0 Brad Bergan, 2022-10-25 *Space Race 2.0* is the only authoritative photographic history of the efforts of private companies often alongside NASA to accelerate humankind's exploration and understanding of the final frontier The private space sector is growing tremendously The industry's consensus leader SpaceX headed by outspoken billionaire Elon Musk is today worth an estimated 74 billion And SpaceX and its chief competitors Blue Origin and Virgin Galactic are taking on more roles flying cargo supplies and astronauts to outer space *Space Race 2.0* tells their story with expertly written text by science journalist Brad Bergan and stunning photography of the spacecraft key players and facilities in California Texas and Florida In the 1950s and 60s the first Space Race pitted two political ideologies against one another either Communism or Capitalism would prove superior Ultimately the US landed on the moon the race's crowning achievement Now more than a half century later the Space Race has pivoted from a contest between ideological rivals to private aerospace firms competing for contracts Today rather than symbolic goals motivated by patriotism the defining success of a launch system extends beyond engineering and science to image and ROI Founded in 2002 SpaceX's trajectory was determined by Musk's realization that he could achieve higher profits by vertically integrating manufacturing his own rockets and spacecraft rather than relying on third parties The decision was prescient resulting in a state of the art headquarters in Hawthorne California and a series of stunning achievements *Space Race 2.0* follows the development of commercial space exploration to the present While tentative first steps in private ventures are covered such

as those by Space Services Inc and Orbital Science in the 1980s and 90s the focus is on today's major players SpaceX Blue Origin headed by Amazon founder Jeff Bezos and Virgin Galactic founded by Richard Branson While examining the hardware Bergan also explores such considerations as the importance of design forward equipment and the endgame what ultimately is in it for firms at the forefront Natural resources NASA and ESA contracts Commercial travel Communications And what legal boundaries if any restrain corporate interests in space Space Race 2.0 is the ultimate visual look at this relatively young industry looking back at recent remarkable decades and ahead to what the future might bring **NASA Tech Briefs**, 1986
