Weimar Culture and Quantum Mechanics

Paul Forman, Cathryn Carson, A. B. Kozhevnikov, 2011 This volume reprints Paul Forman's classic papers on the history of physics in post World War I Germany and the invention of quantum mechanics The Forman thesis has become famous as the first argument in favor of the cultural conditioning of scientific knowledge in particular for its demonstration of the historical connection between the culture of Weimar Germany known for its irrationality and antisocialism and the emerging concept of quantum acausality At the 2007 international conference in Vancouver Canada leading historians of physics discussed the implications of the Forman thesis in the historiography of modern science Their papers collected in this volume represent a cutting edge research on the history of quantum revolution

Floating Bones Cynthia Roses-Thema, 2020-11-29 Floating Bones charts the author's journey into tensegrity which begins in ballet and culminates in a model for addressing one's body as a teacher Tensegrity flips traditional biomechanical models such that instead of support coming from the bones the bones float and it is the muscles and other soft connective tissue that provide support for the moving body Using the model of tensegritic experience Roses Thema connects somatics cognition rhetoric and reflective practices detailing the means that constructed approaching the body as a teacher This study presents the argument for extending the models of thinking to include bodily thinking by citing how the experiential perspective of tensegrity constructs physical evidence of the rhetorical concept metis where the body thinks as it moves This book will be of great interest to students scholars and practitioners of dance theater and sociology

*Yoga, Fascia, Anatomy and Movement, Second edition* Joanne Avison, 2021-05-28 From Anatomy to Architecture from Biomechanical to Biomotional and from Classical to Connected speaks to all bodies in all modalities in a world seeking unity and connection more than ever Yoga Fascia Anatomy and Movement was written partly as an appeal for Yoga Teachers to appreciate the depth and breadth of Yoga as a science a

movement practice and a philosophy that fundamentally espouses wholeness as the basis of living anatomy and form Yoga calls for unifying who and how we are and as teachers how we can help our clients who are all different move better Classical Anatomy in the West divides the body down into its component parts and traditionally unchanged for 400 years reduces its functionality to those parts usually described in a 2D iconic forms and founded in lever based mechanics In the East such reductionism was never espoused and Yoga Fascia Anatomy and Movement covers two huge bases to bridge the difference and upgrade understanding of Yoga to 21st Century anatomy The first is to recognise that the leading edge of Fascia Science changes all those reductionist views anatomically and biomechanically It is carefully explained in the first part of the book and shows how the New Science of Body Architecture actually makes perfect sense of yogic philosophy of union and wholeness The second is to take this paradigm shift and apply it in practice to the subtle understanding of the fascial architecture and how that helps us move better Yoga Fascia Anatomy and Movement attempts to ask questions find suitable research and make all this practical and applicable to teachers and practitioners of all types Indeed it teaches posture profiling and creating Class Mandalas to support this It is a contemporary yoga teacher s bible *Energy Medicine - E-Book* James L. **Ribbon of Darkness** Barbara Maria Stafford, 2019-06-21 Over the course of her career Barbara Stafford has established herself the preeminent scholar of the intersections of the arts and sciences articulating new theories and methods for understanding the sublime the mysterious the inscrutable Omnivorous in her research she has published work that embraces neuroscience and philosophy biology and culture pinpointing connections among each discipline s parallel concerns Ribbon of Darkness is a monument to the scope of her work and the range of her intellect At times associative but always incisive the essays in this new volume take on a distinctly contemporary purpose to uncover the ethical force and moral aspects of overlapping scientific and creative inquiries This shared territory Stafford argues offers important insights into and clarifications of current dilemmas about personhood the supposedly menial nature of manual skill the questionable

borderlands of gene editing the potentially refining value of dualism and the limits of a materialist worldview Stafford organizes these essays around three concepts that structure the book inscrutability ineffability and intuitability All three she explains allow us to examine how both the arts and the sciences imaginatively infer meaning from the veiled behavior of matter bringing these historically divided subjects into a shared intellectual inquiry and imbuing them with an ethical urgency A vanguard work at the intersection of the arts and sciences this book will be sure to guide readers from either realm into unfamiliar yet undeniably fertile territory

These are the symptoms which confront all practitioners of manual therapy in their everyday practice. In this second edition of his very successful book, Leon Chaitow brings together contributions from 20 leading practitioners and researchers from many different fields of manual therapy. **Fascial Dysfunction: Manual Therapy Approaches, Second Edition** aims to help those practitioners to assess more precisely the dysfunction of their clients and its cause and to increase practitioner awareness of the various techniques which may help them in their attempts to alleviate their clients' problems. New features of the Second edition include: Descriptions of new research evidence and its implications for practice; The dependence of collagen health on a mixture of balanced internal and external tension; The importance of adequate hydration; The possible role of the telocyte; The importance of dosage of therapies in management of fascial dysfunction; New chapters on Gua Sha and cupping; Global postural re-education; Scar remodelling. The book is in two sections. Section I, written by Chaitow with a contribution by Tom Myers, presents a review of the current understanding of the function of fascia in the human body and describes what can go wrong, the causes and effects of fascial dysfunction and disease and how to assess the problem and remove obstacles to the success of treatment. Section II contains chapters by experts in different types of manual therapy, including three by Chaitow. Each practitioner describes their own approach to the problem of assessing and treating fascial dysfunction and explains their specialist therapeutic approach. These approaches include: Bowen Therapy; Connective Tissue Manipulation and Skin Rolling; Fascia oriented training applications in sports and movement therapy; The Fascial Manipulation method applied to low back pain; Fascial Unwinding; Balanced Ligamentous Tension Technique; Gua sha press stroking and Ba guan cupping; traditional East Asian instrument assisted manual therapies; Muscle Energy Techniques (MET); Myofascial Induction Therapy (MIT); Neuromuscular Technique and associated Soft Tissue Manipulation Modalities; Positional Release Techniques including counterstrain; Global Postural Re-education; Souchard Method; Rolfing; Structural Integration; Management of Scars and Adhesions; Manual Matrix Remodeling in myofascial injuries; scar modeling technique; Massage Therapy and Fascia Trigger Point release methods including dry needling.
