

Installation Instructions

For M3RL Series Furnaces

IMPORTANT: Read these instructions and the M3RL Installation Instructions carefully before beginning the installation.

GENERAL

These instructions are primarily intended to assist qualified individuals experienced in the proper vent and combustion intake pipe installations of this appliance. This kit is to be used for field replacement of a non-condensing manufactured housing furnace with an M3RL series furnace. It may be used at elevations up to 8,000 feet above sea level. M3RL furnace series are condensing gas furnaces and must be vented with PVC or equivalent pipe to prevent vent corrosion. Using the replacement vent caps in this kit, you may easily install the vent and combustion air intake pipes for the new furnace utilizing an existing roof jack as a chase. Some local codes require licensed installation/service personnel for installation of this type of equipment.

Contents of Kit:

1. Installation Instructions for Field Replacement Furnace Venting.
2. 2- Replacement Vent Caps
3. 2- 2" Rubber Couplings
4. 4- 2" Diameter Clamps
5. 2- 90° SPIG X HUB Elbows
6. 6- #10 Sheet Metal Screws

WARNING!

The replacement furnace must be installed by a qualified service technician in accordance with these instructions and all codes having jurisdiction. Failure to follow these instructions could result in serious injury, property damage, or death. The qualified service technician performing this work assumes responsibility for this furnace installation.

INSTALLING THE KIT

- A. Verify structural integrity of the roof flashing and upper and lower combustion air pipes. NOTE:** Do not use this kit with existing roof jacks that are not sound.
- B. Replace the existing furnace with the new M3RL furnace. (See M3RL Installation Instructions)**

C. To Remove Unnecessary Parts from the Old Roof Jack: (see Figure 1)

1. Disassemble the top roof jack by unscrewing the screws and connecting it to the upper combustion air intake pipe.
2. Remove brackets from the combustion air intake upper pipe. The brackets are 1/8" pop riveted and must be removed by drilling them with a 1/8" drill bit.
3. Remove the inner and outer flue pipes (6" diameter) from the roof jack.

Note: Disassembly instructions may vary depending upon the age and design of the roof jack.

Figure 1. Typical Existing Roof Jack
