

The image shows a breadboard circuit for a flame detection project. A green PCB with a yellow LCD screen is used. The screen displays "Flame : Detected" and the website "www.TheEngineeringProjects.com". A 16-pin D-sub connector is plugged into the bottom of the PCB. Wires connect the connector pins to various components: pins 1, 2, and 3 are connected to a red potentiometer (RV2) and a 10k resistor; pins 4, 5, and 6 are connected to a 9V battery; pins 7, 8, and 9 are connected to ground; and pins 10, 11, 12, 13, 14, 15, and 16 are connected to a series of resistors.

Regardless of the hour or time zone information is being shared by somebody somewhere Social media is a game changer influencing the way in which terror groups are changing their tactics and also how their acts of terror are perceived by the members of the public they intend to influence This book explores how social media adoption by terrorists interacts with privacy law freedom of expression data protection and surveillance legislation through an exploration of the fascinating primary resources themselves covering everything from the Snowden Leaks the rise of ISIS to Charlie Hebdo The book also covers lesser worn paths such as the travel guide that proudly boasts that you can get Bounty and Twix bars mid conflict and the best local hair salons for jihadi brides These vignettes amongst the many others explored in this volume bring to life the legal policy and ethical debates considered in this volume representing an important part in the development of understanding terrorist narratives on social media by framing the legislative debate This book represents an invaluable guide for lawyers government bodies the defence services academics students and businesses

Readings in Planning James Allen, James A. Hendler, Austin Tate, 1990 This book presents four contributions to planning research within an integrated framework James Allen offers a survey of his research in the field of temporal reasoning and then describes a planning system formalized and implemented directly as an inference process in the temporal logic Starting from the same logic Henry Kautz develops the first formal specification of the plan recognition process and develops a powerful family of algorithms for plan recognition in complex situations Richard Pelavin then extends the temporal logic with model operators that allow the representation to support reasoning about complex planning situations involving simultaneous interacting actions and interaction with external events Finally Josh Tenenbarg introduces two different formalisms of abstraction in planning systems and explores the properties of these abstraction techniques in depth
