## **Islam Dismantled The Mental Illness Of Prophet Muhammad:**

Islam Dismantled Sujit Das, 2012-02 Das dismantles Islam by exposing the imposture of Muhammad The irony is that the entire religion of Islam is based on the truth claim of such a man who could easily swing back and forth between the two extremes Nreality and fantasy The author asserts Muhammad suffered from malignant narcissism and was also affected by neurotic disorder which caused regular psychiatric delusions

**Qur'anic Hermeneutics** Abdulla Galadari, 2018-08-09 This book is open access and available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com) Qur anic Hermeneutics argues for the importance of understanding the polysemous nature of the words in the Qur an and outlines a new method of Qur anic exegesis called intertextual polysemy By interweaving science history and religious studies Abdulla Galadari introduces a linguistic approach which draws on neuropsychology This book features examples of intertextual polysemy within the Qur an as well as between the Qur an and the Bible It provides examples that intimately engage with Christological concepts of the Gospels in addition to examples of allegorical interpretation through inner Qur anic allusions Galadari reveals how new creative insights are possible and argues that the Qur an did not come to denounce the Gospel which is one of the stumbling blocks between Islam and Christianity but only to interpret it in its own words

The Influence of Islam on the Mental Health of Muslims living in the West Nejla Demirkaya, 2015-03-10 Seminar paper from the year 2014 in the subject Orientalism Sinology Islamic Studies grade 1 3 University of G ttingen Centre for Modern Indian Studies course Religion health and medicine in India language English abstract For the past decade the Islamic faith especially when represented by minority communities living in Western countries has repeatedly been the subject of heated debate in the political and the public sphere Its followers are consequently confronted with the predicament of living in accordance to the prescriptions of their faith and being compelled to justify it In this regard Islamic adherence could very well be assessed as quite a burden However religion and spirituality have long since been recognised as beneficial to the coping process in times of emotional and psychological distress albeit predominantly in the Christian context Acknowledging the special situation of Muslims in Western countries this paper aims to provide an analysis of the situation of Muslims with mental health issues living in a non Islamic society namely the multicultural secular societies of the UK and the USA It furthermore seeks to establish in what ways the Islamic religion influences the patients outlook on themselves and their choices of treatment It presumes that anti Muslim bias unfortunately widespread in the West has its impact on its victims psychological well being Not merely belonging to a minority group but one that is continuously hated against might prove to be a factor that negatively affects the psychological health of Muslims Numerous questions are inherently connected with this approach How does affiliation to Islam influence adherence to treatment regimes Do Muslims in the West generally oppose biomedicine Or are biomedical and traditional treatment complementary in the minds of the sick Does Islam promote behaviour beneficial to mental health or does it rather constitute a risk factor Does the simple fact of following Islam present Muslims living in the West with conditions harmful to their

mental health      Perceptions of Mental Health Problems in Islam Nada Eltaiba, 2007 In this research I analyse how mental health problems are perceived in two primary Islamic texts the Qur'an the holy book for Muslims and the Hadith the sayings and traditions of Prophet Muhammad I then integrate this analysis with the perceptions of a cohort of Jordanian Muslims about their mental health problems and treatment Two important theoretical frameworks underpin this research namely the post colonial theorizing of scholars such as Edward Said Franz Fanon and Homi Bhabha and the Explanatory Model of Arthur Kleinman Research on the assessment and treatment of mental illness in Islamic and Arabic culture is limited What literature does exist suggests that in spite of the increase in research on cultural issues related to mental health there is a strong need for further research to explore the nexus between culture religion and mental health diagnosis and treatment in non western cultures in order to advance cultural sensitivity amongst mental health professions This research fills this lacuna in mental health scholarship about the mental health awareness and experiences of Muslims All of the interviews were conducted at the Mental Health Centre in Jordan where twenty male and female participants were selected and then interviewed using a semi structured interview schedule The textual analysis commenced while I was in Jordan but was completed on my return to Australia The data were analysed using both NVivo software and manual coding The results of this analysis are organized around the two main themes that emerged those of Causation and Help seeking Sub themes to each of these primary themes provide a comprehensive picture of the understanding and behavior of Muslim people accessing assistance from a mental health clinic and contribute to understanding of mental health issues related to Islam and to Muslims living in Jordan The research identifies that religion and religious belief are absolutely central to the way that this cohort of Muslim participants interpret the cause and development of their mental health problems and further it posits that this is due in part to the explanations of causation and coping contained in primary Muslim texts      Understanding Muhammad (Tamil translation) Ali Sina, 2008-10 Why are some Muslims intolerant violent and supremacist Why do they bully What spurs them to riot and murder over the silliest things To understand Muslims one must understand their prophet This psychobiography seeks to unveil the mystery of the prophet of Islam Historians tell us Muhammad used to withdraw to a cave spending days wrapped in his thoughts He heard bells ringing and had ghostly visions He thought he was demon possessed until his wife reassured him he had become a prophet Convinced of his status he was intolerant of those who rejected him assassinated those who criticized him raided looted and massacred entire populations He reduced thousands to slavery raped and allowed his men to rape female captives All of this he did with a clear conscience and a sense of entitlement He was magnanimous toward those who admired him but vengeful toward those who did not He believed he was the most perfect human creation and the universe's raison d'être Muhammad was no ordinary man This book ventures beyond the stories Focusing on the why rather than the what it unravels the mystique of one of the most enigmatic and influential men in history Islam is Muhammadanism Muslims worship and emulate Muhammad Only by understanding him can one know what makes them tick Understanding

Muhammad begins with a brief history of his life Muhammad had a loveless childhood He then passed to the care of relatives who took pity on him and spoiled him As the result he developed narcissistic personality disorder a trait that made him a megalomaniac bereft of conscience Muhammad believed in his own cause Even when he lied he felt entitled and justified to do so Thanks to another mental illness namely temporal lobe epilepsy the prophet of Islam had vivid hallucinations he interpreted as mystical and divine intimations He also suffered from obsessive compulsive disorder causing his fixations on numbers rituals and stringent rules In the addition he suffered from acromegaly a disease caused by excessive production of a growth hormone resulting in large bones and odd facial features The combination of his psychological disorders and his unusual physiognomy made him a phenomenon that set him apart from ordinary people His uneducated followers interpreted his differences as signs of his prophethood Like devotees of all cults they rose to champion his cause with dedication By defying death and butchering others they made Islam the world s second largest religion now the biggest threat to world peace The author argues that Islam is incompatible with democracy and human rights and the only way to avert the clash between barbarity and civilization and a world disaster is to expose its fallacy and demystify it Muslims must be weaned from Islam for humanity to live in peace says Ali Sina

**Islam and Mental Health** Harold G. Koenig, Saad Saleh Al Shohaib, 2017-03-22 This book is for mental health professionals clergy researchers and laypersons interested in the relationship between religion spirituality and mental health in Muslims A description of Islamic beliefs practices and values is followed by a systematic review of research conducted in Muslim populations and then by recommendations for practice based on research clinical experience and common sense The authors are physician researchers who have spent over 30 years practicing medicine and investigating the relationship between religion and health in Muslim populations Dr Koenig directs Duke University s Center for Spirituality Theology and Health and Dr Al Shohaib is a professor of medicine and nephrologist at King Abdulaziz University in Jeddah Saudi Arabia Both are clinicians who for decades have treated patients with a wide range of physical and emotional disorders using a faith based approach In this volume which is well documented and highly cited they bring together over 50 years of research that has examined how religious faith impacts the mental health of Muslims including original research on well being and happiness in Muslims that has not been reported elsewhere The authors explain what these findings mean for those who are seeking to provide hope meaning and healing to members of this faith tradition

**Arabs in Treatment:** Yana Korobko, 2016-08-19 When I was only starting the therapeutic work with the Middle Eastern patients I was looking for some kind of guidance to enable my genuine understanding of the Muslim patient cases However the material was scarce haphazardly scattered and mostly referring to the traditional therapies That was not helpful and was even more confusing With time I managed to amass my own systemized data based on regular observations practical cases reflections and exchanges with the colleagues This material helped me to approach each case individually while respecting the cultural environment of a patient Eventually the book was published This is the kind of book

that I have always wanted to find and I had to write it eventually by myself The work contains the systematized knowledge on the evolution of scientific psychology in the Islamic world which starts with the prophetic times and continues until now The book reveals the signifiers which form a structure of a Muslim psyche It also exposes the recurrent mental health complaints of the Arab patients and investigates their unconscious roots The book is intended first of all for professionals who are directly related to the Muslim mental health care system Secondly it is for anyone who is considering undergoing a personal analysis And certainly the edition is for everyone interested in the subject This book does not intend to bring the answers It rather continues the dialogue regarding the necessity of creating the psychological counseling culture in the Muslim world

*Al-Junūn* Ihsan Al-Issa, 2000 Chapters on religion and psychopathology mental illness in medieval Islamic society and forensic psychiatry under Islamic law are followed by chapters on psychopathology in the diverse cultures of Algeria the Arab Gulf Iran Malaysia Pakistan and Saudi Arabia and the mental health of Muslims who live in the West The book concludes with chapters on psychotherapy in Islamic society sex and sexual dysfunction BOOK JACKET

### **Qur'an & Emotional Health**

Ezra Hewing, 2014-05-22 The Qur'an Until now there has been very little bringing mental health and Islam together in this format e Service manager working within Muslim communities A good opener to any therapeutic intervention An excellent educational resource for all e Integrative counsellor and group facilitator The resources and tools in the booklet give me an invaluable foot in the door for working more effectively e Caring services worker The Qur'an Emotional Health An Introduction has been produced in partnership between Suffolk Mind Registered Charity No 1003061 and Ipswich Suffolk Muslim Council All proceeds support the project aims of good mental health and wellbeing for Muslims and Muslim communities

**Psychological Foundation of The Qur'an III** Muhammad Shoaib Shahid, 2016-02-05 As a professor and psychotherapist I have found that the current Western research is not only subjective and a creation of only the past 125 years ago it is culturally biased and of limited human personal experiences Therefore I have challenged these aspects by narrating the rational objective and universal fundamental knowledge provided 1430 years ago by the Creator that comes in action after death in an accountability process without individual discrimination for example please see Chapter 1 I My most difficult task was to pinpoint the causes and solutions of human sufferings and depict the mental health principles presented in the Qur'an 1430 years ago that turned the ignorant and arrogant tribal Arab people into the most civilized model nation of the world They turned out to be leaders in various faculties of science technology and social sciences I have not only presented the analysis but also the solutions for its application in daily life affairs please see Chapter 9 I My sole mission is to provide logical and authentic knowledge of the Qur'an throughout the world for creating insight among laypeople that the Creator knows better about His human being a deputy and the most desired creature on earth who gets derailed becomes extremist and arrogant under worldly persuasions and forgets the ultimate end of life The solutions and guidelines to pass a moderate purposeful life are available but one has to open up understand and act on the given directions I believe that my

contribution in these books is the first time that APA standardized tools have been applied along with direct references to the Qur'an for the adolescents truth seekers and psychologists I think at this age level I must contribute all my energy to pass on this message to everyone
