[The Rise of Science in Islam and the West](#) John W. Livingston, 2017-12-14 This is a study of science in Muslim society from its rise in the 8th century to the efforts of 19th century Muslim thinkers and reformers to regain the lost ethos that had given birth to the rich scientific heritage of earlier Muslim civilization. The volume is organized in four parts: the rise of science in Muslim society in its historical setting of political and intellectual expansion; the Muslim creative achievement and original discoveries; proponents and opponents of science in a religiously oriented society; and finally the complex factors that account for the end of the 500 year Muslim renaissance. The book brings together and treats in depth using primary and secondary sources in Arabic, Turkish and European languages subjects that are lightly and uncritically brushed over in non specialized literature such as the question of what can be considered to be purely original scientific advancement in Muslim civilization over and above what was inherited from the Greco-Syriac and Indian traditions; what was the place of science in a religious society and the question of the curious demise of the Muslim scientific renaissance after centuries of creativity. The book also interprets the history of the rise, achievement and decline of scientific study in light of the religious temper and of the political and socio-economic vicissitudes across Islamdom for over a millennium and integrates the Muslim legacy with the history of Latin European accomplishments. It sets the stage for the next momentous transmission of science from the West back to the Arabic speaking world of Islam from the last half of the 19th century to the early 21st century, the subject of a second volume.

The Future of Peace and Justice in the Global Village Thomas R. McFaul, 2006-09-30 Many authors have written on the effect technology, economics and politics have on globalization but few have addressed the potential impact of world religions on the future direction of globalization. McFaul's fascinating book explores what others have not: the part the world's

major religions Hinduism Buddhism Jainism Zoroastrianism Judaism Christianity and Islam will play in bringing either greater peace and justice or hatred and hostility to the global village Will these religions which exert the greatest amount of influence worldwide be a force for good or ill in the emerging global village of the 21st century This book answers that question and more Covering the religions to which the majority of world s population adheres it offers insight into the commonalities differences and potential for coming together to create peace to be found among the major faiths The world s seven major religions are covered and topics such as sexuality ethics violence and the tension between secular and sacred arenas are discussed for each McFaul argues that if the leaders and laity of these religions are able to find common ground efforts toward peace and justice in the global village can be more effective and lasting If they accentuate their differences he suggests they will only produce more hatred and hostility *The Beginnings of Western Science* David C.

Lindberg,2010-02-15 The most comprehensive account of ancient and medieval science a standard work for understanding the history of science *The Beginnings of Western Science* is a landmark the best book to ever to present a unified account of both ancient and medieval science in a single volume Chronicling the development of scientific ideas practices and institutions from pre Socratic Greek philosophy to late Medieval scholasticism David C Lindberg surveys all the most important themes in the history of science including developments in cosmology astronomy mechanics optics alchemy natural history and medicine In addition he offers an illuminating account of the transmission of Greek science to medieval Islam and subsequently to medieval Europe For decades this book has shaped the way students and scholars understand these critically formative periods of scientific development and it continues to be essential to an understanding of the field this updated second edition includes revisions on nearly every page as well as several sections that have been completely rewritten For example the section on Islamic science was thoroughly retooled to reveal the magnitude and sophistication of medieval Muslim scientific achievement And the book now reflects a sharper awareness of the importance of Mesopotamian science for the development of Greek astronomy In all the second edition of *The Beginnings of Western Science* captures the current state of our understanding of more than two millennia of science and promises to continue to inspire both students and general readers *NOTES ON EUROPEAN ISLAM AND THE WEST* Brandino Rangoni Machiavelli,2018-01-29 Western

society has lost its moral balance The decline of the pervasive belief in a consoling unquestionable hereafter should be replaced by a new sense of belonging to a common destiny which can be lived and enjoyed without strife But humanity needs a guide And the basic teachings of the Quran transformed into a modern set of principles which are unchangeable and universal could provide such a guide *Makers of Contemporary Islam* John L. Esposito,John Obert Voll,2001 *Makers of Contemporary Islam* examines the biographies of nine major activist intellectuals whose work provides the core of what the Islamic resurgence became in the 1990 s and is an important foundation for what it can become in the 21st century The profiles of these internationally recognized figures provide a new understanding of the intellectual foundations of

contemporary Islamic awareness and Muslim politics Nine figures are covered Ismail al Faruqi Khurshid Ahmad Maryam Jameelah Hasan Hanafi Anwar Ibrahim and Abdurrahman Wahid These intellectual activists represent a distinctive phase in the evolution of Islamic thinking the ongoing effort to create an effective synthesis of modernity and Islamic tradition *Makers of Contemporary Islam* is essential reading for students and scholars of Middle Eastern and Islamic studies as well as general readers interested in the Islamic resurgence and international affairs Library of Congress Subject Headings Library of Congress,2013
