About Tech 2

Tech 2 is a hand held diagnostic computer, designed specifically to help you diagnose and repair problems with a whole range of complex electronic systems. When Tech 2 is attached to a vehicle, it guides you step-by-step through each of its programmed test procedures. Tech 2 functions are accessed through its keyboard, commanding it to:

- Conduct a test you may want to run.
- Retrieve the diagnostic data you want.
- Control the function you want to monitor.

Tech 2 requires a 12V-power source and would normally use the vehicle to be tested electrical system, and talks or "interfaces" with the vehicle electronic systems through the Data Link Connector (DLC). However when using Tech 2 on 24V systems an external 12V power source must be utilised. When connected to the DLC, Tech 2 can read Diagnostic Trouble Codes (DTCs), and other diagnostic data.

With the adapters that come with Tech 2, it can communicate with most on-board computer systems used on vehicles fitted with an appropriate DLC provided the applicable software is available. Depending on the application selected, Tech 2 can also control or "command" some systems for troubleshooting or remote testing.
E.g. Transmission control solenoids.

- N-Series trucks plug directly into the DLC and require an external 12V-power supply.
- F, C and E-Series trucks require the Tech 2 adapter, which has a built-in voltage reducer and communication translator.
