Kohlbacher,2007-10-23 The capability of MNCs to create transfer and combine knowledge from different locations is an important determinant of corporate success This book uses examples of knowledge based firms Hewlett Packard Consulting Integration Siemens Mazda and Maekawa to show that knowledge based marketing is key to a sustainable competitive advantage *Organisational Capital* Ahmed Bounfour,2008-12-04 There is much debate as to how companies carry out their activities in the context of new information and communication technologies influencing organizations to decentralize and develop new managerial practises including outsourcing and networking Recent theories have emphasized the importance of organization as a key component for building corporate competitive advantage and scholars have looked at this from a range of perspectives including in relation to intangible assets human capital work training and the process dimension Yet the concept of organisational capital as such in spite of its indubitable relevance and attractiveness is still to be clarified until now In this book the subject is approached in four ways Firstly from an analytical perspective what is the status of organisational capital as a concept and how is it defined secondly from an ontological perspective what type of implicit

orders can be designed and implemented around organisations thirdly from the measurement perspective what kind of frameworks and what type of metrics can be prototyped and finally the implementation perspective how should organizations integrate the organisational capital perspective in the definition and implementation of their strategies for resources allocation The book provides the first multifaceted and international effort from a broad perspective aiming at clarifying the concept of organisational capital and determining its analytical and operational implications **Profound Improvement**

**Sustainable Improvement** Coral Mitchell,Larry Sickney,2019-02-11 Drawing on two decades of research into the nature of schools as learning communities the authors build on a prior model of learning communities that integrated three domains of capacity personal interpersonal and organizational In this text the authors move the capacity building model into practice and elaborate a theory of learning communities This book situates learning communities in living systems and ecological perspectives The fundamental premise is that all of human life and human activity is part of a deep planetary ecology of which mutuality and interdependence are cornerstone properties learning and renewal are key processes and

emergent networks are foundational structures The text juxtaposes these conceptions with educational practices in order to understand what makes practice different in learning community schools The authors argue that sustainable educational improvement emerges from a reciprocal process of building people who are constantly learning building commitments to authentic learning and building schools with a relentless focus on learning The authors conclude that building a sustainable learning community requires a profound shift in how learning is understood discussed valued enabled and expressed This shift they argue is essential as schools face the challenges and opportunities in the knowledge society

*Mapping Workflows and Managing Knowledge* John L. Kmetz, 2012-07-23 This is a book that does what the title says and is different from most business process mapping information in three key ways First it lets you capture all the knowledge that goes into a workflow in any kind of organization including the most difficult kind of all the tacit knowledge people bring to the job and carry in their heads Second it is simple powerful flexible and easy to learn Finally this book does not require installing learning and applying a complicated program sometimes requiring reorganization to support the software rather than the software supporting the organization It was developed by the author in a 15 year long program of studying analyzing and improving avionics maintenance processes for the U S Navy and the Royal Canadian Air Force and then applied to organizations of all kinds over more than two decades It has been taught and applied by the author and others in many short courses In short this book works
