The African State in a Changing Global Context István Tarrósy, Loránd Szabó, Göran Hydén, 2011 During the first 25 years of independence the African state was largely driven from within by the ambition to establish political order in a world where national sovereignty over issues of development was not in question The theme of this book is that more is at stake today than in the past **The International Response to Somali Piracy** Bibi van Ginkel, Frans-Paul van der Putten, 2010-09-24

Africa Benjamin Barton, 2016-05-23 China's rise on the international scene over the past few years has correlated with its exponential economic growth The European Union EU the world's largest development aid provider has been feeling the heat of Beijing's closer ties with Africa As a result the EU's overall policy making towards Africa has suffered from a loss of credibility and this has been further exposed both by the success of China's investments in Africa and by the favourable response that China's investment proposals have received from African leaders Dividing the book into five parts the editors and an outstanding line up of Chinese and European contributors guide the reader through the complexities of China's rising influence in Africa but they also analyse if and how the EU should adapt to this Planning Guide for Power Distribution

An EU Innovative External Action? Ludovica Marchi Balossi-Restelli, 2011-07-12 An EU Innovative External Action discusses both the EU's growing challenges from its near and far neighbourhood and the developments within the EU that seek to meet them The European Security Strategy 2003 and its updating 2008 have pointed out some of the growing external problems These documents have outlined the goals for the EU's future activity in terms of general principles and policy rather than of specific actions adopting a holistic approach covering a wide range of civilian responses as well as the military dimension of security This book is an empirical investigation which reflects these different aspects and pressures exploring the interaction between resources and capacities policies and processes and influences from within and outside the EU Its main argument is the need for the EU to work towards meeting its external challenges by developing innovative action The crucial challenges that this volume explores include the EU's approach to the European External Action Service the EU's handling of Russia China and Iran the legal aspects of the Common Security and Defence Policy's CSDP military operations legal issues regarding the EU's combating of piracy and armed robbery in the CSDP Operation Atalanta the influences and issues inherent in the EU's coordination of the above military marine operation the political control and strategic direction on decision making by the Political Security Committee the establishment of the EU's rapid reaction force within the CSDP framework and its present in action and the CSDP's experimentation in the promotion of peace and security on the African continent This volume examines EU behaviour in the above policy areas and issues and how the Union is dealing with the risks it faces today This book aims to promote an interdisciplinary debate The contributions to this volume originated from a workshop concerned with the European Union Facing External Challenges held at Pembroke College Cambridge in October 2009 organised with the support of Geoffrey Edwards POLIS University of Cambridge These reflect the views of experts from various nations and institutions operating in

diverse cultural realities and fields The rationale for employing interdisciplinary resources is in line with the way in which the European Union and the European Commission are encouraging a dialogue about EU policies The authors are academics political analysts from think tanks and officials from the European Commission and the European Council all involved at various levels in European affairs They are Laure Delcour G rard Dejou Andrea deGuttry Elina Dzalbe Roxane Farmanfarmaian Ludovica Marchi Balossi Restelli Jing Men Antonio Missiroli Frederik Naert and Alex Vines Jolyon Howorth Yale University contributed to the workshop as a discussant and this is noticeable in the building up of the book s argument An EU Innovative External Action will be of interest to students and scholars of European studies focused on EU s external challenges policy makers involved in European affairs and the wider public **Technology and Development** ,1990

assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America's first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China's campaign plan aimed at keeping reinforcing U S forces at arm's length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi's vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached International Maritime Security Law James Kraska, Raul Pedrozo, 2013-04-15

International Maritime Security Law by James Kraska and Raul Pedrozo defines an emerging interdisciplinary field of law and policy comprised of norms legal regimes and rules to address today's hybrid threats to the global order of the oceans Worldwide shipping commerce fishing fleets pleasure craft and coastal states are exposed to the menace of offshore terrorism weapons of mass destruction piracy smuggling robbery marine insurgency and anti access threats Land based institutions and maritime constabulary forces operate within an increasingly integrated network that blends elements of humanitarian law human rights law criminal law and law of the sea with inspection regimes commercial enterprise and marine safety and environmental stewardship The new authorities fuse together a global maritime partnership among states international organizations and commercial interests to protect the maritime commons from the most dangerous risks and hazards **Multinational Rapid Response Mechanisms** John Karlsrud, Yf Reykers, 2018-12-19 The track record of military rapid response mechanisms troops on standby ready to be deployed to a crisis within a short time frame by intergovernmental organizations remains disappointing Yet many of the obstacles to multinational actors launching a rapid and effective military response in times of crisis are largely similar This book is the first comprehensive and comparative contribution to explore and identify the key factors that hamper and enable the development and deployment of multinational rapid response mechanisms Examining lessons from deployments by the AU the EU NATO and the UN in the Central African Republic Mali Somalia and counter piracy in the Horn of Africa the contributors focus upon the following questions Was there a rapid response to the crises By whom If not what were the major obstacles to rapid response Did inter organizational competition hinder responsiveness Or did cooperation facilitate responsiveness Bringing together leading scholars working in this area offers a unique opportunity to analyze and develop lessons for policy makers and for theorists of inter organizational relations This work will be of interest to scholars and students of peacebuilding peacekeeping legitimacy and international relations Assuring the Freedom of Americans on the High Seas United States. Piracy Robert C. McCabe, 2017-09-14 This book examines the complex phenomena of modern maritime piracy. The work offers a cutting edge analysis of modern maritime piracy in the two most pirate prone regions, southeast Asia and northeast Africa, from the late twentieth century to the modern day. These case studies present a detailed exploration of how regional and international governments responded to upsurges of piracy and how responses have evolved over the course of the past 40 years. This analysis reveals the results of these efforts and what effect, if any, suppressing piracy at sea had on tensions and instability ashore. The book transcends a simple narrative, providing detailed and extensively researched case studies of contemporary manifestations and responses at the strategic, operational, and tactical levels. New insights are offered, such as the role of external navies in the repression of piracy in northeast Africa before the well-documented escalation in 2005. In addition, this book constructs a comparative analytic framework to gauge the effectiveness and shortcomings of modern attempts to counteract piracy, which reveals lessons learned, future policy projections, and wider implications. This analysis adds new classifications, innovative concepts, and scholarly depth to the field of maritime security studies, naval history, and theory, and international relations. This book will be of much interest to students of naval history, maritime security, strategic studies, and international relations.
