Is There a Middle East? Abbas Amanat, 2012 This book offers diverse debates on the possible manifestations and meanings of the term Middle East *Overlapping Regional Orders in the Middle East and North Africa* Jordi Quero, 2023-11-24 Focused on a set of overlapping international orders of regional scope present in the Middle East and North Africa this book argues that rules and primary institutions have sanctioned the foreign behavior of the sub system s international actors since 1945 The author avoids recent IR trends focused on narrow case studies instead providing a comprehensive overview of the MENA s regional politics The normative content and evolution of multiple international orders are examined constituting the intra Arab order the Arab Israeli order and the Arab Iranian order as well as the expression of the global order in regional interactions Drawing on Area Studies and English School and constructivist IR theories the author argues that a plurality of overlapping regional orders have coexisted since 1945 not just one as is commonly suggested in the literature Each of these orders is integrated by different participants and has developed its own differentiated norms and institutions setting parameters on legitimate behavior This analytical proposal helps make sense of foreign relations otherwise labeled as incoherent The book has wide appeal accessible both to students wishing to learn about the politics history and sociology of the Middle East as well as to specialists seeking original research on the functioning of the MENA s regional orders Routledge Handbook on Tourism in the Middle East and North Africa Dallen Timothy, 2018-12-07 The Routledge Handbook on Tourism in the Middle East and North Africa examines the importance of tourism as a historical economic social environmental religious and political force in the Middle East and North Africa MENA It highlights the ecological and resource challenges related to water desert environments climate change and oil It provides an in depth analysis of the geopolitical conditions that have long determined the patterns of tourism demand and supply throughout the region and how these play out in the everyday lives of residents and destinations as they attempt to grow tourism or ignore it entirely While cultural heritage remains the primary tourism asset for the region as a whole many new types of tourisms are emerging especially in the Arabian Gulf region where hyper development is closely associated with the increasingly prominent role of luxury real estate and shopping retail medical tourism cruises and transit tourism The growing phenomenon of an expatriate workforce and how its segregation from the citizenry creates a dual socio economic system in several countries is unmatched by other regions of the world Many indigenous people of MENA keep themselves apart from other dominant groups in the region although these social boundaries are becoming increasingly blurred as tourism being one socio economic force for change has inspired many nomadic peoples to settle into towns and villages and rely more on tourists for their livelihoods All of these issues and more shape the foundations of this book This Handbook is the first of its kind to examine tourism from a broad regional and inclusive perspective surveying a broad range of social cultural heritage ecological and political matters in a single volume With a wide range of contributors many of whom are natives of the Middle

East and North Africa this Handbook is a vital resource for students and scholars interested in Tourism Middle East Studies and Geography *The Middle East and North Africa* Alasdair Drysdale, 2024-10-15 This contemporary text the first in over a decade on the region presents the geography of the Middle East and North Africa defined as the Arab World Israel Turkey Iran and Afghanistan Thematically organized the book's eleven chapters focus on the region's physical and climatic setting demographic characteristics migration patterns religious and linguistic diversity political map offshore claims oil and gas resources and subregions and states Within this framework Drysdale emphasizes pressing current problems the impact of climate change in a region where some areas already suffer from extreme summer heat and aridity the challenge of providing additional water in a region where per capita availability of freshwater is already the lowest in the world the impact of high fertility and rapid population growth in a fragile environment where economies are often unable to absorb young workers entering the labor force the looming prospect of an aging population the effects of out and in migration the diverse impact and role of Islam in daily and public life the integrative consequences of linguistic and ethnic diversity the evolution and imperfections of the political map ongoing territorial and boundary disputes that often have global repercussions external dependence on the region's prolific oil and gas resources and the extreme regional inequalities associated with their presence or absence This timely and insightful analysis is essential reading for students of the region who need a better understanding of key regional characteristics challenges and issues *Mapping the Middle East* Zayde Antrim, 2018-04-15 Mapping the Middle East explores the many ways people have visualized the vast area lying between the Atlantic Ocean and the Oxus and Indus River Valleys over the past millennium By analyzing maps produced from the eleventh century on Zayde Antrim emphasizes the deep roots of mapping in a region too often considered unexamined and unchanging before the modern period As Antrim argues better known maps from the nineteenth and twentieth centuries a period coinciding with European colonialism and the rise of the nation state not only obscure this rich past but also constrain visions for the region's future Organized chronologically Mapping the Middle East addresses the medieval Realm of Islam the sixteenth to eighteenth century Ottoman Empire French and British colonialism through World War I nationalism in modern Turkey Iran and Israel Palestine and alternative geographies in the twentieth and twenty first centuries Vivid color illustrations throughout allow readers to compare the maps themselves with Antrim's analysis Much more than a conventional history of cartography Mapping the Middle East is an incisive critique of the changing relationship between maps and belonging in a dynamic world region over the past thousand years *The ^AOxford Handbook of Energy Politics* Kathleen J. Hancock, Juliann Emmons Allison, 2020-12-02 This Handbook synthesizes the diverse literature on energy to provide a foundational resource for teaching and research on critical energy issues in international relations and comparative politics Through chapters authored by both scholars and practitioners the Handbook further develops the energy politics scholarship and community and generates sophisticated new work that will benefit all who work on energy issues Tectonic Evolution,
